The Hubert H. Humphrey Metrodome . . . Home of the Golden Gophers

Minnesota's second 100 years of collegiate football were marked by the move from Memorial Stadium (1924) to the Hubert H. Humphrey Metrodome (1982) in downtown Minneapolis, and the change signified a new era for Golden Gopher football.

Also home to the Minnesota Vikings of the National Football League and the Minnesota Twins of the American Baseball League, the Metrodome will seat 62,218 gridiron fans under a 12-story high teflon coated fiberglass roof.

The move to the Metrodome was made with the hope of making Golden Gopher football all the more enjoyable to Minnesota fans, and while you are in the facility for this event, U of M officials ask that you please follow these specific rules:

FIRST AID — A first aid room is located in room 120 on the lower level of the Metrodome. The room is staffed by members of the University of Minnesota Emergency Medical Response team which has been trained in first aid as well as cardiac pulmonary resuscitation techniques. All staff members are certified in American Red Cross Advanced First Aid or Emergency Medical Technician Standards. These staffers have received additional training by the American Red Cross to familiarize them with the unique features of the Metrodome. If you are in need of first aid or emergency treatment or see someone that does, alert the nearest uniformed usher.

LOST AND FOUND — Call Sims Ushering at 721-3501 for assistance.

WILL CALL TICKETS — Public and press will call windows both are located at the Golden Gopher ticket office on Fifth Street on the south side of the Metrodome.

PERSONAL PAGING — Because University authorities have found it extremely difficult to administer requests for

emergency announcements over the public address system, all such requests for personal paging and announcements will be refused. ANY PATRON EXPECTING AN EMERGENCY CALL IS INSTRUCTED TO LEAVE HIS NAME AND SPECIFIC SEAT LOCATION ON FILE WITH THE TICKET OFFICE. CALL 373-3181 OR STOP AT THE INFORMATION WINDOW AT THE SOUTH END OF THE METRODOME ON GAME DAY.

BEVERAGE/CONTAINER REGULATIONS — A stadium ordinance prohibits all beverage containers from being brought into the stadium. Alcoholic and nonalcoholic beverages and their containers will not be allowed to be brought into the dome.

The Golden Gophers will strictly enforce this law. Ushers and security personnel have been instructed to deny stadium entry to anyone attempting to carry in cans, bottles, paper or plastic containers. Only after the containers have been properly disposed of will entrance to the stadium be allowed.

SMOKING — Smoking is not allowed in the stadium proper. The stadium proper is designated a public non smoking area. Smoking is allowed on both the first and second deck concourses.

THINK OF OTHER FANS — Spectators are requested not to stand in the aisles or leave the stands during the last few minutes of the final quarter because of the inconvenience to patrons who desire to have a clear view of the field. Those patrons seated near the aisles will appreciate your courtesy in remaining seated until the end of the game.

As spectators and participants, we share a number of privileges and responsibilities. The University has a fundamental concern with conduct that breaks the peace, causes disorder or in-

terferes with the enjoyment of others. Members of the University community whose conduct is in conflict with those concerns will be dealt with according to policies and standards of behavior that apply to University sponsored events.

We ask that you be aware of your responsibility to those around you and of your right to courtesy from them. University staff members are present to assist you if you feel your rights as spectators are not being respected.

If a patron's conduct endangers or disrupts the players, coaches, officials or other patrons, the University reserves the right to remove the offending patron from the premises. No refund will be made. Every person, regardless of age, must have a ticket. Intoxicants, loud radios, noisemakers and signs may not be brought into the Metrodome per University, Conference and Metrodome policy.

John Idstrom Wins 10K Run At UM

Former Gopher All-America selection John Idstrom, the 1982 Big Ten 10,000-meter champion, captured last Saturday's Golden Gopher 10K Run for Children at Memorial Stadium with a time of 29 minutes, 42.6 seconds.

Ann Jones, a fifteen year old from Minneapolis, finished first among the women competitors with a clocking of 40 minutes, 24 seconds.

Proceeds from the competition, sponsored by the University of Minnesota Men's Intercollegiate Athletic Department and Normandale Tennis Clubs, Inc., go to the Minneapolis Crisis Nursery for Children. The race attracted a field of over 700 runners and raised nearly \$5,000.

Roy Griak, U of M cross country and track coach and the race's organizer, expressed gratitude to numerous business corporations from the area who helped make the event possible.

Refreshments were donated by General Mills' Yoplait Yogurt Division, Kemps Ice Cream and Speciality Brokerage Limited (ice cream topping).

ROUSER

Minnesota, hats off to thee!
To thy colors true we shall ever be;
Firm and strong, united we are,
Rah! Rah! Rah! for Ski-U-Mah,
Rah! Rah! Rah! Rah!
Rah! for the U. of M.

HAIL MINNESOTA

Minnesota hail to thee!
Hail to thee our college dear!
Thy light shall ever be
A beacon bright and clear.
Thy sons and daughters true
Will proclaim thee near and far.
They will guard thy fame
And adore thy name;
Thou shalt be their Northern Star.
Like the stream that bends to sea.
Like the pine that seeks the blue;
Minnesota, still for thee
Thy sons are strong and true,
From their woods and waters fair;
From their prairies waving far,
At thy call they throng
With their shout and song,
Hailing thee their Northern Star.

MINNESOTA MARCH

Rah! Rah! Ski-U-Mah.
Rah! Rah! Rah!
March on, March on to Victory,
Loyal Sons of the Varsity,
Fight on, Fight on for Minnesota,
For the glory of the Old Maroon
and Gold.
March on, March on to win the game,
Down the field, fighting every
play,
We're with you, team Fighting
team!
Hear our song, we cheer along
To help you win a victory.

FRIDAY LUNCHEONS SET

The "M" Club again is sponsoring luncheons with Coach Joe Salem each Friday prior to a home Gopher football game at Normandy Inn in downtown Minneapolis.

Those luncheons are open to the public and will feature, in addition to Coach Salem, a celebrity MC, Gopher players, a representative of the visiting team and a "surprise" guest.

TRY ON A WINNER

THE OLYMPIAN MAGAZINE

The Olympian brings you what no other sports magazine in the world can...the inside story on America's Olympic athletes and their training and preparations for the challenge in 1984 when the Olympic Games come to Los Angeles.

In addition, you'll follow our Winter Olympic sports athletes as they get ready for the '84 Games in Yugoslavia, and perhaps another "Miracle on Ice," like the stunning U.S. hockey triumph at Lake Placid in 1980.

Fill out the coupon in this ad and return it to the U.S. Olympic Committee with your check for \$19.84 and we'll start your subscription to The Olympian and make you a part of the U.S. Olympic Team.

It's one move you can make without straining a muscle that will go a long way in helping our Olympic athletes reach their goal for 1984!

About the "U"

The University of Minnesota was founded in February of 1851, seven years before the territory achieved statehood, and it is enjoying its 132nd year of serving the higher educational needs of its people. The University ranks 7th in total enrollment (including evening) with over 76,000 students. The Twin Cities campus alone totals over 47,000 day students, the largest single campus in the country.

The University is dedicated to the task of training the youth of Minnesota and the region and its success is measured in part by the success of its graduates or faculty. Seven have been Nobel Prize winners including Norman C. Borlaug (peace prize 1970).

Other noted graduates include actresses Linda Kelsey and Gale Sondergaard, pioneer balloonist and minister Jeannette Piccard, civil rights leaders Roy Wilkins and Whitney Young, Jr., Dr. Christiaan Barnard and Dr. Norman E. Shumway, pioneers in heart transplant surgery, the late U.S. Senator and former Vice President Hubert H. Humphrey, former U.S. Senator Wendell Anderson (also a former hockey letterman), journalists Eric Sevareid, Harry Reasoner and Hedley Donovan, physicist Lawrence Hafstad and actors Peter Graves and James Arness.

In addition to providing regular collegiate instruction for students on its campuses, the University gives specialized training to thousands of other Minnesotans through continuing education programs. Its staff members, who are county agents, home agents, 4-H Club agents and recreation and health consultants, also regularly assist citizens of the state in their communities.

University scientists are constantly working on research of vital importance to the future welfare of the state and the nation in the school's diverse research laboratories on each of the campuses and the several agricultural experiment stations scattered throughout the state.

University researchers continue studying projects that concern heart surgery, cancer, drainage control, gamma radiation, teacher training, municipal government, space physics, nuclear energy, modern mathematics, science courses for primary and secondary schools and new creation of varieties in agricultural and horticultural species.

The institution is a cultural hub of the Upper Mississippi Valley area and the home of several cultural groups including the University Artists Courses, University Theatre, the Mississippi River Showboat and area performances of the Metropolitan Opera.

Contributions to the school from the people of Minnesota have led to the construction of the James Ford Bell Museum of Natural History, the Journalism School's Murphy Hall, the Variety Club Heart Hospital, the Children's Rehabilitation Hospital and the Mayo Memorial Hospital.

stake a claim in gold country

Bryan Hickerson

Gold Country

A SPECIAL THANKS . . . to the nearly 50,000 Golden Gopher fans who have shown their support for the Williams Fund, either through a direct financial contribution or through participation in one of our 30 fund raising activities.

Stu Oftelie

Greg McCoy

Dear Golden Gopher Fans:

Everything is made easier with teamwork, whether it's in everyday life or in competitive athletics at the University of Minnesota. It is our desire to interest you in sharing the thrill of being part of such a team.

Our Gold Country assignment is to maintain a total program, a competitive program and a quality program in men's intercollegiate athletics.

To fulfill this assignment, it is necessary to gain your help . . . not only as a fan in the stands but as a contributor to the Williams Fund.

The Williams Fund, vital to Minnesota's program which remains totally self supporting, is built on two basic purposes: to lend financial assistance to those student athletes who attain and maintain a B average and, once those Williams Scholars in all sports are accommodated, to be used at the discretion of the athletic director in augmenting Minnesota's total operating budget.

It takes over \$4,000 a year for an in-state student athlete and an additional \$1,600 for an out-of-state student athlete to pay room, board, books and tuition. Those costs, like so many others today, continue to rise.

Attaining membership on a Minnesota's Williams Fund team can be gratifying and beneficial. All gifts are tax deductible, and a variety of privileges are granted to contributors. More detailed information may be obtained by contacting me at (612) 373-4924.

A contribution of \$100 qualifies a person for membership in the Century Club, \$500 for membership in the Maroon and Gold Club and \$1,000 for membership in the Golden Gopher Club. Now is the time to become a part of one of those teams and help the University of Minnesota. By doing so, you'll be involved in the Gopher's modern day Gold Rush.

Most word processor screens cause 12,000 tiring dilations of the eye per day.

CPT's doesn't.

For some reason, most word processors have dark-colored display screens.

Which means the people who use them have to look back and forth between a dark screen and white paper all day—as much as 12,000 times a day.

According to Dr. Gerald Radl, a German scientist who studies the workplace, this can cause eyestrain, headaches, and dizziness.

His prescription? Make the screen look like the paper.

Just like the black-on-white screen you'll find on CPT's word processors.

A screen, incidentally, which *The Office Products Analyst* calls

"the best display in the industry."

CPT believes, like Dr. Radl, that the more comfortable a word processor is to use, the more work people are likely to get done with it. And the better they'll feel about it.

Let us show you how we can make your job easier.

And how, with CPT's planned Office Dialog Link™ network, CPT word processors can automate your entire office, tying in everything from computers to electronic mail and data services.

Our latest booklet covers it all. Get your free 28-page copy, simply by

mailing the coupon below.

The *black-on-white* coupon.

Send for our free booklet. *How To Get Into Word Processing — A Step At A Time*. Packed with useful advice and information.

Go Go Golden Gophers!

From Three All-Americans

SPROUT
HALFBACK

POPPIN' FRESH®
QUARTERBACK

GREEN GIANT
DEFENSE/PUNTER

1

SPROUT
HALFBACK

HEIGHT: Small
WEIGHT: Light
COLLEGE: Valley A&M

Still a green rookie, Sprout's the cream of the crop in the backfield. A quick, open-field runner whose career is mushrooming, Sprout causes defenders to boil as he plows through bushels of tacklers. A real #1 pick.

2

POPPIN' FRESH
QUARTERBACK

HEIGHT: 5 inches, in his cleats
WEIGHT: 8 oz.
COLLEGE: U.D.C.
(University of the Dairy Case)

A smart roll-out quarterback, Poppin' Fresh stays cool under pressure. When things get hot, he rises to the occasion with soft-touch passing and light-on-his-feet running. A tough player, used to getting poked in the stomach, Poppin' Fresh's ability to bounce back is the icing on the cake.

3

JOLLY GREEN GIANT
DEFENSE/PUNTER

HEIGHT: Taller than most
WEIGHT: Heavier than most
COLLEGE: V.S.U. (Valley State University)

Green Giant ("Jolly" to his teammates) covers the field on defense. Playing all positions at the same time, no team has ever scored a point against him. As the team punter, Green Giant holds the league record for the longest punt—9.62 miles.

**Only Williams Arena
and the Metrodome

©1983 Midwest Communications, Inc.

A starter since his freshman year, Pitt's junior offensive tackle Bill Fralic made first team AP All-America last year.

Last year, Kenny Jackson became the first Penn State wide receiver to earn All-America honors.

THE NATION'S BEST IN OFFENSE

by Herschel Nissenson, College Football Editor, Associated Press

Johnny Majors was hacking his way around a Dallas golf course in June during the American Football Coaches Association's annual tournament when someone spoiled his reverie by mentioning that offensive tackle Bill Fralic of Pitt just might be the best college football player in the nation.

And since Pitt, the school Majors coached to a national championship in 1976, just happens to be Tennessee's first opponent, Majors' ears perked up.

He grinned and said: "That's okay. I'm just glad the best football player in the nation isn't a quarterback or running back at Pitt."

That could be an accurate description of the national picture this fall. Last year's outstanding crop of quarterbacks (John Elway, Todd Blackledge, Jim Kelly, Tony Eason, Dan Marino) and runners (Herschel Walker, Eric Dickerson, Curt Warner, Kelvin Bryant, Michael Haddix,

Oklahoma State's Ernest Anderson set a Big Eight record in 1982 by rushing for 1,877 yards.

Tim Spencer, Craig James, Gary Anderson) has been riddled by graduation and the United States Football League, leaving plenty of room for unheralded and, as yet, unpublicized performers to burst upon the scene with a bang.

Offensive linemen do not rush for a hundred yards a game or pass for several hundred, but the runner or passer who can do those things without the guys in the pit hasn't come along yet. So in rounding up this season's potential stars on offense, let's forget about the "skill" people for a while and give some much-deserved publicity to the behemoths who do the dirty work.

Fralic is massive at 6-5, 270—and he's only a junior. Two years ago, he became the first Pitt freshman to start his first collegiate game since Tony Dorsett in 1973. He stepped right into the position vacated

continued

continued

Duke QB Ben Bennett topped the ACC in passing efficiency and total offense in '82.

by Outland Trophy winner Mark May and was named first team All-America by the Associated Press in 1982.

"Bill Fralic is simply a great, great football player," says Joe Moore, Pitt's offensive line coach. "As a freshman, his pass blocking was unbelievable. In his sophomore year, his pass blocking improved. As a freshman, his run blocking was outstanding. His sophomore year, he improved his run blocking. If he continues to make the same improvement, I feel he has a chance to become one of the greatest—if not *the* greatest—offensive lineman to play the college game."

Down South, LSU has a junior tackle named Lance Smith, who stands 6-2, 295, and draws the same kind of rave reviews as Fralic. "If there is a better offensive lineman in the country at this stage in his career, I haven't seen him," says Coach Jerry Stovall. "Lance is the complete offensive tackle and he gets better every game." Smith made nine "domination" blocks against Florida and was in the game for all 84 offensive plays against Alabama.

Georgia has a pair of top-notch tackles in Jimmy Harper and Guy McIntyre, North Carolina is wild about 295-pound Brian Blados and Ohio State's Bill Roberts is among the elite.

Others to watch: Conrad Goode (Missouri), Glen Howe (Southern Mississippi), Tom Jelesky (Purdue), Joe Milinichik (North Carolina State), John Robertson (East Carolina) and Lloyd Taylor (Long Beach State).

Texas guard Doug Dawson, a 6-3, 255-pound senior, has started 26 straight

games beginning with the Bluebonnet Bowl his freshman year. An exceptional pass blocker, his average grade on the field was 92.4 percent. Off the field, he's a good student in petroleum engineering.

Nebraska's headlines will go mostly to I-back Mike Rozier and quarterback Turner Gill, and deservedly so. But up front, the lone returnee from the Cornhuskers' 1982 Monsters of the Midlands is 6-4, 269-pound guard Dean Steinkuhler. He covers 40 yards in a startling 4.67 seconds and he consistently got the highest rating among Nebraska's linemen last year, who included two-time Outland winner Dave Rimington.

Others to watch: Jim Boyle (Tulane), James Farr (Clemson), Stefan Humphries (Michigan), Kevin Igo (Oklahoma State), David Jordan (Auburn), Dave Kuresa (Utah State), Terry Long (East Carolina), Paul Parker (Oklahoma) and Jeff Zimmerman (Oregon).

With Rimington hogging the spotlight among the nation's centers for two years, Southern Cal's Tony Slaton had to settle for All-West Coast as a sophomore and junior. He is now a 6-4, 255-pound senior

Florida's Wayne Peace set an NCAA passing record last season.

and Coach Ted Tollner says Slaton "has the best quickness—both straight ahead and laterally—of any center I've ever seen."

Slaton's competition for post-season honors should come from Tom Dixon (Michigan), Philip Ebinger (Duke), Tom McCormick (Florida State) and Chuck Thomas (Oklahoma).

Now for the headline-hoggers, the folks who run with the ball, throw it and catch it. Some of them may not be household names just yet, but it probably won't be

BYU's QB Steve Young tossed for 3,100 yards and 18 TDs in 1982.

too long.

The Big Eight Conference has three of the best ballcarriers around in Nebraska's Rozier, Ernest Anderson of Oklahoma State and Marcus Dupree of Oklahoma.

Last fall, Rozier earned Big Eight Player of the Year honors by rushing for 1,689 yards—a single-season Nebraska record—and scoring 15 touchdowns. His per-game average of 140.8 yards was fourth nationally and heading into his final year the 5-11, 210-pounder needed only 183 yards to become the Huskers' career rushing king. A fine receiver and kick returner, backfield coach Mike Corgan calls him "strong as a bull and quick as a cobra."

What do Marcus Allen, Tony Dorsett, Herschel Walker and Ed Marinaro have in common? They are the only runners in NCAA history to rush for more than the 1,877 yards that Ernest Anderson piled up last fall. That figure is the best in Big Eight history and the 5-10, 190-pound Anderson tied the league mark with four 200-yard

continued

The legend of The Pendleton Shirt.

It all began in the Pacific Northwest. At the turn of the century, a pioneer family began weaving blankets, robes and shawls of exceptional quality in Pendleton, Oregon. Many designs were inspired by the motifs of the nearby Nez Perce Indian Nation.

It was an ideal place for such a beginning. Rich grasslands nurtured bands of sheep that grew wool of the highest quality. Soft, pure water was abundant for scouring and dyeing. And the family brought to the task a heritage of weaving which began generations before in England.

Through the years, Pendleton blankets and robes came to be considered a standard of value among settlers and Indians throughout the West.

And so the legend of excellence began.

The family then applied its skills to the creation of 100% virgin wool clothing fabrics. Fine, beautiful fabrics which were then tailored into shirts that loggers, ranchers and sportsmen of the region could wear a lifetime.

Each shirt was "warranted to be a Pendleton," to assure the buyer that the company stood behind its products, in quality and workmanship.

And the legend grew.

Today, four generations later, the family is still making shirts warranted to be Pendletons, to the same standards our forefathers

set those many years ago.

We continue to use only pure, virgin wools, selected and graded by hand each shearing season.

We design the patterns, dye the wool, spin the yarn, weave the fabrics.

And then, in over 60 careful steps, these pure virgin wool fabrics are cut and sewn into Pendleton Shirts.

It is this commitment to quality and value in 100% virgin wool, this attention to detail every step, every stitch of the way, that makes a Pendleton Shirt different from every shirt in the world.

It is the commitment we have always made to a Pendleton Shirt. And always will.

The legend deserves no less.

BEST IN OFFENSE

continued

games and set an Oklahoma State record by rambling for 270 yards against Kansas. Don't let Anderson's size fool you—he owns the Big Eight record for a running back with a 390-pound bench press.

Dupree, a 240-pounder, capped a sensational freshman year—his 905 regular-season yards made him the first rookie ever to lead Oklahoma in rushing, and he didn't even become a starter until the Sooners junked the Wishbone in favor of the I-formation—with a Fiesta Bowl record 239 yards against Arizona State, the nation's No. 1-rated defense. Dupree had a remarkable run of cross-country touchdown gallops in his last seven games, scoring at least once from 30 yards out in each contest and six times from more than 60 yards.

According to the tub-thumpers at Auburn, Bo Jackson "could be the most talented athlete in Southeastern Conference history." Auburn's first three-sport letterman in 30 years also plays baseball—he was the New York Yankees' top draft pick in 1982—and runs track. As a freshman, the 222-pounder was Auburn's leading rusher with 829 yards—a 6.5 average—and scored nine touchdowns, including the winner against Alabama.

Auburn's other Wishbone halfback,

Photo by Morse Photography

Maryland's Willie Joyner rushed for 1,039 yards in 1982.

166-pound Lionel "Little Train" James, rushed for 779 yards on 113 carries—a 6.9 average—and led the nation in punt returns with a 15.8-yard average on 24 returns. And one that Auburn let get away after his freshman year, Sam DeJarnette of Southern Mississippi, finished fifth in the country on the 1982 rushing charts with 1,545 yards. Also returning from last year's leaders are Michael Gunter of Tulsa (1,464 yards and a nation-leading 7.5 per carry), Robert Lavette of Georgia Tech (1,208), Willie Joyner of Maryland (1,039) and John Kershner of Air Force (1,056).

Others to watch: Greg Allen (Florida State), the nation's leading scorer with 20 touchdowns; Vaughn Broadnax (Ohio State); Darryl Clack (Arizona State); Dalton Hilliard and Garry James (LSU); Greg Bell and Allen Pinkett (Notre Dame); Vaughn Johnson (Arizona); Napoleon McCallum (Navy); Joe McIntosh (North Carolina State); Ricky Moore (Alabama); Lorenzo Hampton and John L. Williams (Florida); Thomas Dendy (South Carolina); Jacque Robinson (Washington) and Jon Williams (Penn State).

What? No one from Southern Cal? With no super tailback on the scene and with the arrival of new coach Ted Tollner, an acknowledged genius when it comes to the passing game, the Trojans may put the ball in the air more than usual. But winning is the name of the game and the winningest quarterback around doesn't have glamorous individual statistics. However, the Southern Methodist Mustangs have won two consecutive Southwest Confer-

After gaining 1,208 yards last year, Georgia Tech's Robert Lavette should be among 1983's leading runners.

ence championships and are 24-2-1 with Lance McIlhenny at the controls.

McIlhenny is one of those quarterbacks who doesn't seem to do anything except beat you—what coaches like to call a "winner." He was the top-rated signal-caller in the SWC last year, passing for 910 yards—don't forget he had Eric Dickerson and Craig James to hand off to—and 10 touchdowns, while throwing only three interceptions.

If it's great passing numbers you want, look elsewhere—to Wayne Peace (Florida); Ben Bennett (Duke); Steve Young (Brigham Young). They ranked fourth, fifth and sixth nationally last season under the NCAA's complicated passing efficiency formula. Peace set an NCAA record by completing 70.73 percent of his passes (174 of 246); Bennett topped the Atlantic Coast Conference in total offense and passing efficiency, while Young, a direct descendent of Brigham Young himself, threw for 3,100 yards and 18 touchdowns and has some believers touting him as the best passer in BYU history, which is nothing to sneeze at.

The most exciting quarterbacks could turn out to be Todd Dillon of Long Beach State and Doug Flutie of Boston College.

Long Beach State led the major college ranks in passing a year ago and Dillon's total offense figure of 3,587 yards was the second best in NCAA history. Dillon completed 289 of 504 attempts (57 percent) for 3,517 yards and 19 touchdowns in his first season of major college competition

continued

and had seven games of better than 300 yards in total offense.

To look at 5-10, 170-pound, baby-faced Doug Flutie, you probably wouldn't take him for Mr. Excitement. The computer science major is anything but a programmed quarterback and his talent for ad-libbing a potential loss into a long gain has driven more than one opponent up the wall. He passed for a whopping 520 yards against national champion Penn State last season, took B.C. the length of the field in the final 78 seconds to beat Rutgers and produced the tie-breaking score in the final minute against Syracuse, all of which helped the Eagles to their first bowl trip in 40 years.

For his sophomore season, Flutie passed for 2,739 yards, a New England record, and Coach Jack Bicknell says: "Sometimes Doug gets a bit out of control. He does some things on his own, which has its pluses and minuses. But he is so unique and can do so many things. We don't want to turn him into a robot. He really goes into every game expecting good things to happen. I don't think he harbors any negative thoughts. It all boils down to the fact that he's a kid with tremendous confidence in himself. It's infectious. The offensive line is saying, 'If we can just protect this little sonofagun...' And the receivers know that if they get open, he'll get them the ball."

Penn State's Joe Paterno is a bit more dramatic. "That Doug Flutie goes boom-boom-boom, and bingo! They have a touchdown."

Nebraska's Turner Gill came back from a 1981 nerve injury in his leg that threatened to end his career and led the Cornhuskers to a 12-1 record, a second straight

Big Eight title and almost the national championship. Probably Nebraska's best all-around quarterback, Gill completed 90 of 166 passes for 1,182 yards and 11 touchdowns, with just three interceptions, and rushed for 497 yards and four TDs. With Gill at the helm, the Huskers led the nation in total offense, rushing and scoring.

Others to watch: David Archer (Iowa State); John Bond (Mississippi State); Scott Campbell (Purdue); Boomer Esiason (Maryland); Randall Cunningham (Nevada-Las Vegas); Jeff Hostetler (West Virginia); Walter Lewis (Alabama); Marty Louthan (Air Force); Jeff Nugent (Colorado State); Gary Schofield (Wake Forest); Sandy Schwab (Northwestern); Frank Seurer (Kansas); Steve Smith (Michigan); Brad Taylor (Arkansas); Sean Salisbury (Southern Cal) and Mark McKay (San Diego State), who faces a strong challenge from a heralded redshirt freshman named Jim Plum.

Brigham Young's Gordon Hudson is in a rut. He has caught 67 passes in each of the last two seasons, tying the NCAA record for most receptions by a tight end. At 6-4, 230, there are not many defensive backs who can handle Hudson when he gets up a full head of steam.

Hudson was the consensus All-America tight end a year ago, but a publicity storm is brewing on the West Coast for California's David Lewis, who grabbed 54 passes for 715 yards last year.

Others to watch: Cliff Benson (Purdue); Paul Bergmann (UCLA); Tony Camp (Pacific); John Chesley (Oklahoma State); Glenn Dennison (Miami); John Frank (Ohio State); Jon Harvey (Northwestern); Dave Hestera (Colorado).

Dalton Hilliard, LSU tailback, should be among the nation's leading rushers in 1983.

Penn State has turned out numerous All-Americans over the years, but Kenny Jackson last year became the first Nittany Lion wide receiver to win that honor. He caught 41 passes for 697 yards and seven touchdowns—the last two are school records—and his 18 career TD receptions is another Penn State mark. With Michigan's Anthony Carter having gone to the USFL, Jackson looms as the nation's top wideout.

But watch out for a player who sat out last season after transferring from Nevada-Las Vegas to San Diego State. In 1981, Jim Sandusky led the nation with 68 receptions for 1,346 yards and he could approach those numbers again with the pass-happy Aztecs.

Others to watch this year: Cedric Anderson (Ohio State); Jesse Bendross (Alabama); Jeff Champine (Colorado State); Dwight Collins (Pitt); Dwayne Dixon (Florida); Irving Fryar (Nebraska); Robert Griffin (Tulane); Duane Gunn (Indiana); Jessie Hester (Florida State); Gerald McNeil (Baylor); Eric Richardson (San Jose State); Tim Ryan (Wake Forest) and Eric Wallace (Kansas State).

Thomas Dendy, South Carolina running back, will be a runner to watch this season.

California tight end David Lewis caught 54 passes for 715 yards in 1982.

HOW MUCH DO YOU MISS IF YOU DON'T WATCH THE BALL?

by John Jones,
The New Orleans Times-Picayune

College fans don't watch football games.
They watch the football.

As it's being snapped from the center to the quarterback. As the quarterback hands it off or passes it to another player, who runs with it or catches it or fumbles it.

There is an undeniable logic to ball watching.

Since it always draws a crowd, the ball is easy to follow. And, watching the ball leaves ample time

for important duties such as eating a hot dog, drinking something tall and cool or ogling cheerleaders.

Yet for the fan who takes his football seriously, there is a revolutionary method for attaining a deep understanding of the college game—watch the players instead of the ball.

"Most fans," says the defensive coordinator of a Southeastern Conference bowl team from last season, "know just enough about football to enjoy the game. They read the Sunday morning paper to get an idea about what might have happened.

"There are a few serious fans, though, who've impressed me with what they know. They want to understand the game, and that's much harder. To really understand what your team's doing, you've got to approach things just like a coach would.

continued

DON'T WATCH THE BALL

continued

"Chart down and distance. Chart tendencies. Know where you've got a mismatch and know how to take advantage of it. When a fan can start doing those things, he'll know where the ball is going without having to look."

A few simple procedures, and a minimal financial investment, enable any fan to begin watching the game instead of the ball.

First you gear up. Next you study what you're seeing on offense. Finally, you study what you're seeing on defense.

It's that simple.

Let's begin with the paraphernalia of

game watching.

To initiate your odyssey into the intricacies of college football, send for the media guide of a college team you'll see in person during the season. Address your request to the athletic department. You may want to follow up with a telephone call if you haven't received your guide within 10 days.

Media guides are given to writers and broadcasters as a ready reference source on all team-related facts and figures. Most schools make guides available to the general public for prices well under \$10.

You may also want to send off for the

media guides of teams you'll be watching on television, but remember that televised games have a major drawback: TV games always follow the ball, rather than players.

Read the media guide of the team you'll see in person. Read it from cover to cover. At least twice.

Familiarize yourself with the styles of offense and defense your team uses. Locate the team's depth chart and read up on which players you'll most likely see at each position.

Once you've done your homework you're ready to gear up for the trip to the stadium.

A must for in-stadium game watching is a good pair of binoculars, preferably a pair that provides a wide angle view of the field.

In the old days, days when you followed the ball and didn't have as much to look at or keep track of, binoculars may have been extra baggage. Now they're a requisite.

Bring along a legal sized pad and several pencils for note taking. Since it's cumbersome to keep track of all this assorted gear, you may want to buy a tote bag. Many teams sell tote bags with the university's mascot printed on it.

Come prepared to do all your own game work, but don't discourage the interest of fans sitting near you. You may get lucky and find a friend who shares your interest in learning more about football.

You're thinking like a coach now, so you'll have to forego some of the camaraderie that usually uncorks during a game. Save your partying for later, when you can impress everyone with your knowledge of what really happened.

The statistical goal in each game is to duplicate the work of the university's own crews in the press box and the coaches' box. After a game is over, you want everything down on paper for review and analysis before the next game.

A three-person stat team is ideal. One person charts down, distance and the play run by the offense. The second person charts what formation the offense used and how much yardage the play gained. The third person charts what formation the defense used, whether it blitzed and whether it tried to disguise its intent.

If you don't have any help, be prepared to get as much of the information as possible on your own. You'll be surprised how quickly a play-by-play chart takes shape.

Now that you're properly geared up and have lots of background information, you're ready to start analyzing offense and defense.

Look for your team's play patterns so you'll know where the ball is going.

NEW NISSAN ONE HECK-OF-A- HUNK-OF-A 4x4.

AT YOUR DATSUN DEALER.

MOST POWERFUL STANDARD ENGINE IN ITS CLASS.

- More power than Toyota, Chevy S-10, Ford Ranger and everyone else!
- Most horsepower: 103 hp @ 4800 RPM.
- Most torque: 133 ft.-lbs. @ 2800 RPM.

BED HAS DOUBLE STEEL WALLS. Not in Toyota.

- Cab in Deluxe and Long Bed seats 3 across with more hiproom than Chevy S-10 or Toyota;
- more legroom than Toyota.
- 4 x 4 also available in ST Sport Truck and King Cab® (up to 9 cubic feet of extra inner space for cargo or jump seats in King Cab®).

WIDE-CLEARANCE INDEPENDENT FRONT SUSPENSION.

- Shift from 2WD to 4WD at the flick of a stick. Front hubs lock automatically. Not in Toyota.
- Adjustable torsion bars allow wheels to step over rough spots smoothly, independently; compression rods face rear for extra-wide clearance of obstacles.
- Highest minimum ground clearance of any compact truck.
- Tightest turning circle for maneuvering in tight spots. Runs rings inside Chevy S-10, Ford Ranger, Toyota.

The new Nissan 4 x 4.
It's one heck-of-a-hunk-of-a truck!

DON'T WATCH THE BALL

continued

To reach an understanding of the strategy and tactics of major college football, forget many of the notions you've long held sacred.

Forget about following the ball. You're training yourself to know where the ball is going without having to look.

Forget that the field is 100 yards long. Coaches see the field in five segments that dictate formations and tactics.

The sections are: your team's goal line to its 15-yard line; your team's 15-yard line to its 30-yard line; your team's 30-yard line to the opponent's 30-yard line; the opponent's 30-yard line to its 10-yard line; and the opponent's 10-yard line to its goal line.

Analyze how your team acts and reacts in each of the five segments. Notice how the offense operates in the critical areas near its goal line. Look for changes when the team is at midfield. See whether the defense is being victimized in certain situations.

Once you uncover a pattern to your team's play, you're plotting tendencies. All teams have tendencies; it's just a matter of sorting them out.

Looking for patterns instead of individ-

ual plays helps you to think of your team's offense and defense as if they were novels being written before your eyes.

Each play is a chapter, linked to what has gone before it and what comes after. Very little happens by chance. Plays are not isolated moments, but threads woven into a larger tapestry of offense and defense.

During the first three to four weeks of the season, most teams are feeling themselves out. The early games are an invaluable time for compiling statistical information and discovering tendencies.

Make it a point to notice the little things. They pay off.

"Just the way players are lined up tells you something," says a former line coach of a major southern independent, who in his playing days toiled for one of the Pac-10 schools.

"The story I always remember is about John Brodie. While Brodie was at Stanford, someone noticed that every time he put his left foot forward he ran to the right. Every time his right foot was forward he ran to the left.

"The defensive coaches told their players that whenever they saw Brodie's feet

lined up a certain way they should automatically blitz."

This kind of detail is called a key. The defensive linemen keyed on Brodie's feet and were able to improve their chances against the Stanford offense.

Linemen are often the easiest players to key in college football because they're inclined to cheat on their stances.

For example, a defensive lineman who usually takes a four-point stance on running downs may shift to a three-point stance to allow him more mobility in rushing the passer.

That's a key for the offensive lineman. When the defender is in a three-point stance, he's expecting a pass. Perhaps a well-timed running play on third and long would give the offensive lineman an advantage.

A common key for defensive linemen is reading how players in the offensive front settle their weight before the snap of the ball.

If a player's weight is set back, he's probably going to drop back to pass block or pull out of the line to lead a ballcarrier on a sweep. He's not likely to fire out with

continued

While you're in the stands watching the game, try to think like a coach.

"Without Jensen speakers, you're not all there."

Okay, you've got a Jensen® receiver. Sure, you can cheap out and stick in speakers that aren't Jensen quality. But you'll be paying for it every time you drive.

Remember your speakers are the final—and maybe most important—link in your car audio system. And the technical excellence of Jensen speakers is legendary.

A truly great car audio system starts with a Jensen receiver and goes all the way with the quality sound of Jensen speakers.

Hey, it's great to save money. But if it's the sound that moves you, speakers aren't the place to do it. Complete your system with Jensen speakers. Anything else might be penny wise. But sound foolish.

JENSEN
CAR AUDIO

When it's the sound that moves you.

DON'T WATCH THE BALL

continued

an aggressive block.

If the offensive lineman's weight is set far forward, he's probably hoping to get an edge on a domination block.

Linemen may tip a play by the position of their feet or their stance. Years ago, the prevailing logic was that the offensive guards always tip where the play is headed.

The sophisticated college offenses of the '80s have debunked the guard rule.

Today, it might be a center plotting the course of the ball. Or a particular receiver.

In some situations, player movement disguises the offense's play.

"Some college teams give you false keys," says the offensive coordinator of a resurgent Big Ten team.

"You might send half your linemen in the wrong direction just to make the defense think you're going one way instead of the other. You can pull the linemen away from where the ball's going. They don't even have to hit anybody, just make it look real.

"Misdirection stuff is great once you get it going because a defense doesn't know who to key on and how to react. If you misdirect them seven or eight times a

game and it works, you've really got them thinking."

Defenses have become as sophisticated as modern offenses.

Many of the nation's best collegiate defenses go through several different alignments before settling into their final defense. They try to disguise what defense they're going to run.

At best, this confuses the opponent's quarterback. At worst, it gives the quarterback less time to read the defense and make a decision.

Since the defense is usually reacting to an offensive maneuver, it's a bit easier to follow a handful of players and know where the ball is headed.

When studying a defense, never take your eyes off the inside linebacker at the snap of the ball. Inside linebackers usually key the defense, either by moving to the point of attack to support run defense or by breaking off into pass coverage.

On pass plays, the two inside safeties will usually rotate to the side where the defense expects the ball to be thrown.

As a pass play develops, abandon your binoculars and get a good view of all the routes being run. Chances are you'll know where the ball is going to be thrown

by the way receivers are moving.

The charge of the defensive line is also a key. If the defensive linemen are aggressively attacking the offensive line, chances are they're expecting a quarterback sack. If the defensive line is slow to charge, it's probably hanging back to read the offense before committing itself.

Also, pay attention to how long the defense spends in its huddle. It takes more time to call adjustments to pass coverages. Quick breakup of the huddle could mean a defense is expecting a run.

As you can see, watching players instead of pigskins is a complicated, but rewarding, business.

Concentration, organization and a complete familiarity with your team's strengths and weaknesses is essential.

"Once you get to thinking like a coach," says the defensive coordinator from the SEC team, "you start to enjoy the game so much more.

"Following the ball becomes the last thing you do, not the first. Once you know football, about calling plays and making things happen, the only reason you ever look at the ball is to find out if you gained enough yardage for the first down." ●

Pentax Binoculars. So Jim Wilson can see his son the quarterback and his son the receiver, at once.

Instead of catching just parts of the action, Jim can keep track of the entire game at once with his Pentax 8x40 Gridiron binoculars. They give you a full field of vision—499 feet at 1000 yards. So you spend time watching, not readjusting. And, to get you closer to the action, they're the most powerful wide angle binoculars Pentax makes.

You get coated lenses, and the same kind of craftsmanship in Pentax binoculars as you get in our cameras. And we offer a booklet to help—**CHOOSING THE RIGHT PENTAX BINOCULARS FOR SPECTATOR SPORTS**. It's free, with the name of your nearest dealer, when you call toll-free: **800-323-1718**. In Illinois call 800-942-8881.

Enjoy a Tailgating Party

It's the college football season, and that means it's time to put your portable barbeque, picnic table and chairs in the car, invite some friends along, and add plenty of good food and drink. With those ingredients you've got the makings for a great tailgating party at the local college stadium.

Hormel has put together the following recipes to help ensure that your next tailgating picnic is a memorable one. You might start with the Chili Cheese Dip as an appetizer, then dig into the hearty, open-faced sandwiches and a light salad. *Bon appetit.*

CHILI CHEESE DIP 3 Cups

The life of the party—an exciting chili dip.

4 ounces Cheddar cheese
1 can (15 ounces) chili - no beans
8 ounces creamed cottage cheese
2 to 3 canned green chilies
¼ teaspoon turmeric (optional)
Black olives
Tomatoes

Shred Cheddar cheese or process in food processor. Add remaining ingredients; blend until smooth. Cover and refrigerate at least 2 hours to blend flavors. To serve, transfer to serving bowl and garnish top with black olives and chopped tomatoes. Serve with corn chips and crackers.

SLOPPY JOSÉ 3 or 4 Servings

Try this marvelous Mexican version of the classic Sloppy Joe.

½ cup chopped celery
¼ cup chopped green pepper
Butter or margarine
1 can (15 ounces) tamales
1 can (15 ounces) chili - no beans (or with Beans)
1 loaf (8 ounces) Italian bread
Shredded Cheddar cheese
Sliced green onions
Saute celery and green pepper in 2 tablespoons butter until tender. Remove papers from tamales; slice tamales into bite-size pieces. In medium saucepan, combine tamales, chili, celery and green pepper; cook until hot, stirring occa-

sionally. (You can reheat this mixture on your barbeque when you arrive at the stadium.) Halve bread lengthwise, then cut into sections. Spread with butter and toast on the barbeque. Spoon chili mixture over bread; sprinkle with cheese. Garnish with green onions. (Note: You can substitute sandwich buns, french bread or corn bread for the Italian bread.)

BLT SALAD 4 Servings

Clever calorie-counting! The taste of a favorite sandwich in a streamlined salad.

½ cup plain yogurt
2 teaspoons cooking oil
¼ teaspoon sugar
Dash dry mustard
Pepper to taste
2 tablespoons bacon bits
2 large tomatoes, sliced (about 1 pound)
4 lettuce leaves
Combine yogurt, oil, sugar, mustard, and pepper; stir to mix well. Just before serving stir in bacon. Arrange tomato slices on lettuce leaves; pour dressing over. Sprinkle with additional bacon.

Michelob[®] Light for the Winners.

A rich, smooth taste you can compare to any beer you like.

THE FREE SAFETY

by Billy Watkins,
Jackson Daily News

He must be a brawler and a brain. Fast and tough, smart and anticipative.

And, above all, he must be mistake-free. "He has to have tremendous judgment," said one college coach, "and I mean *tremendous* judgment. The decisions he makes are critical. At the position he's lined up in on the field, you're giving up big plays if he makes a mistake in judgment."

Free safety is as demanding as any position on the football field.

"He's as important as any player on your defense," a coach said. "It's difficult to play good defense without a good free safety back there. If you're trying to play

without a good one, I think you're starting out with a tremendous handicap."

The free safety is responsible for eliminating any long plays by the offense, whether it's a pass or a run. Most of today's defenses are structured around a three-deep zone pass defense. The free safety is responsible for the middle-third, but he must also lend support to the outside-thirds.

And he is not exempt from run support. His primary run responsibilities are usually to the weak side, away from the tight end. But he must be keenly aware in case a runner breaks the line of scrimmage; usually, the free safety is the last man between the runner and a touchdown.

He calls the defensive secondary alignment, and makes any changes in the coverage immediately before the snap.

Finding a player who can fill all the qualifications the position demands is often a difficult task for coaches.

"We look for speed first, always," a coach said. "But the thing we're also looking for is someone with some range, someone who can reach from boundary to boundary. He has to be able to help the cornerbacks on deep patterns, but still protect the middle."

"We don't want a guy who is going to be overly aggressive. We want a guy who will play deep middle. He'll do his job first,

continued

FREE SAFETY

continued

then help out on the corners.

"You want an individual with enough speed so you only have to play him about 10 yards deep. If he doesn't have good speed, you have to play him 14 yards deep, and give up yards on run support.

"And the free safety has to have some brains, too. In what we're doing, he has to be the smartest player on the football field.

"The free safety has to have a real knowledge of the defensive system. He can do an awful lot as far as directing traffic back there. He's the guy who can make your defensive checks, make your adjustments to motions and multiple sets.

"And he's got to be able to control the strong safety and cornerbacks. If one of them is lined up wrong, he's got to try to get him lined up properly."

As a play begins, a free safety reads different offensive keys in different defensive schemes. It might be the quarterback. It might be the flow of the backfield. It might be a receiver.

One coach said, "In our defense, the free safety must anticipate the quarterback. That's his read. He will also read the No. 2 receiver, or the receiver closest to him. Usually, that would be either a slot or a tight end.

"That's what he's looking at: quarter-

back, receiver, back to the quarterback. After he sees where his receiver is going, then he really hones in on the quarterback."

Another coach with a different scheme said, "We don't have the free safety key on any one thing because the sets have become so multiple. He's looking at the formation, and he'll get his reads or keys from a variety of things. But it's all based on his ability to recognize the formation."

A free safety for one Southeastern Conference team said, "I read the flow of the backs, and our zone rotates that way. If they flow strong, we rotate strong. If they flow weak, we roll weak. We read the backs first, then react from there."

His reactions must be sure and well-calculated. A wrong move and his team is lining up for the opposing team's extra-point try.

The free safety must be able to recognize play-action passes.

He must be able to see things on the offensive side of the ball and make a good judgment as to what is happening.

The free safety really has to study the opposing quarterback the week before a game. He has to study all the looks the quarterback might give him trying to fool him into turning the wrong way.

While a free safety may be more noted

for his pass defense, his run support is essential. He plays the run in a different way than the strong safety.

The strong safety's job is to turn plays in on the strong side. He must sacrifice his body to pulling guards and charging fullbacks in order to turn the runner back towards the pursuing defense. That's why the strong safety is considered more of a linebacker than the free safety.

A free safety's run support is more inside-out with more finesse. Because there are fewer people on the weak side, the free safety is supposed to detour the runner towards the sideline—in the direction of the cornerback and the out-of-bounds area rather than turn him inside.

Said one coach, "A free safety might be called on for run support to the strong side, but only in special situations. And it would always be support in the alley on the strong side (between the end and the cornerback). He would be just an extra hand in the alley, not a primary defender."

A Wishbone offense presents the most run-support demands on the free safety. In many defensive schemes against a Wishbone, the free safety has either the quarterback or the pitch-man on both sides. He must read the play quickly, and react immediately.

But he can't be too run conscious. Many Wishbone formations are featuring wide receivers today. The free safety must give inside pass support to the cornerbacks.

It is important that the free safety have a bit of cowboy in him. He must be able to steer-wrestle a runner to the ground when he is the last defender in the path to a touchdown.

"If the ball is caught underneath, the free safety will usually be the last guy with a shot to tackle him," a coach said. "We don't care how pretty the tackle is, just as long as he gets him on the deck."

It's a demanding—but fun—position.

"I love it," said one free safety at a major college. "You're around the ball a lot. You have more chances for interceptions. You're free to roam in a lot of our coverages.

"I played strong safety one year, and that sort of limits you. If the ball isn't thrown in the flat, you're not going to be anywhere near the ball. You're turning to chase somebody down all day. You sort of feel left out."

That isn't the case at free safety. Coaches expect him to have plenty of action.

"We have a rule and we'll continue to live by it," said one coach. "Any time that ball is thrown in the middle of the field, between the hash marks, that ball is his. The free safety should lead your secondary in interceptions every year because of all the chances he'll have."

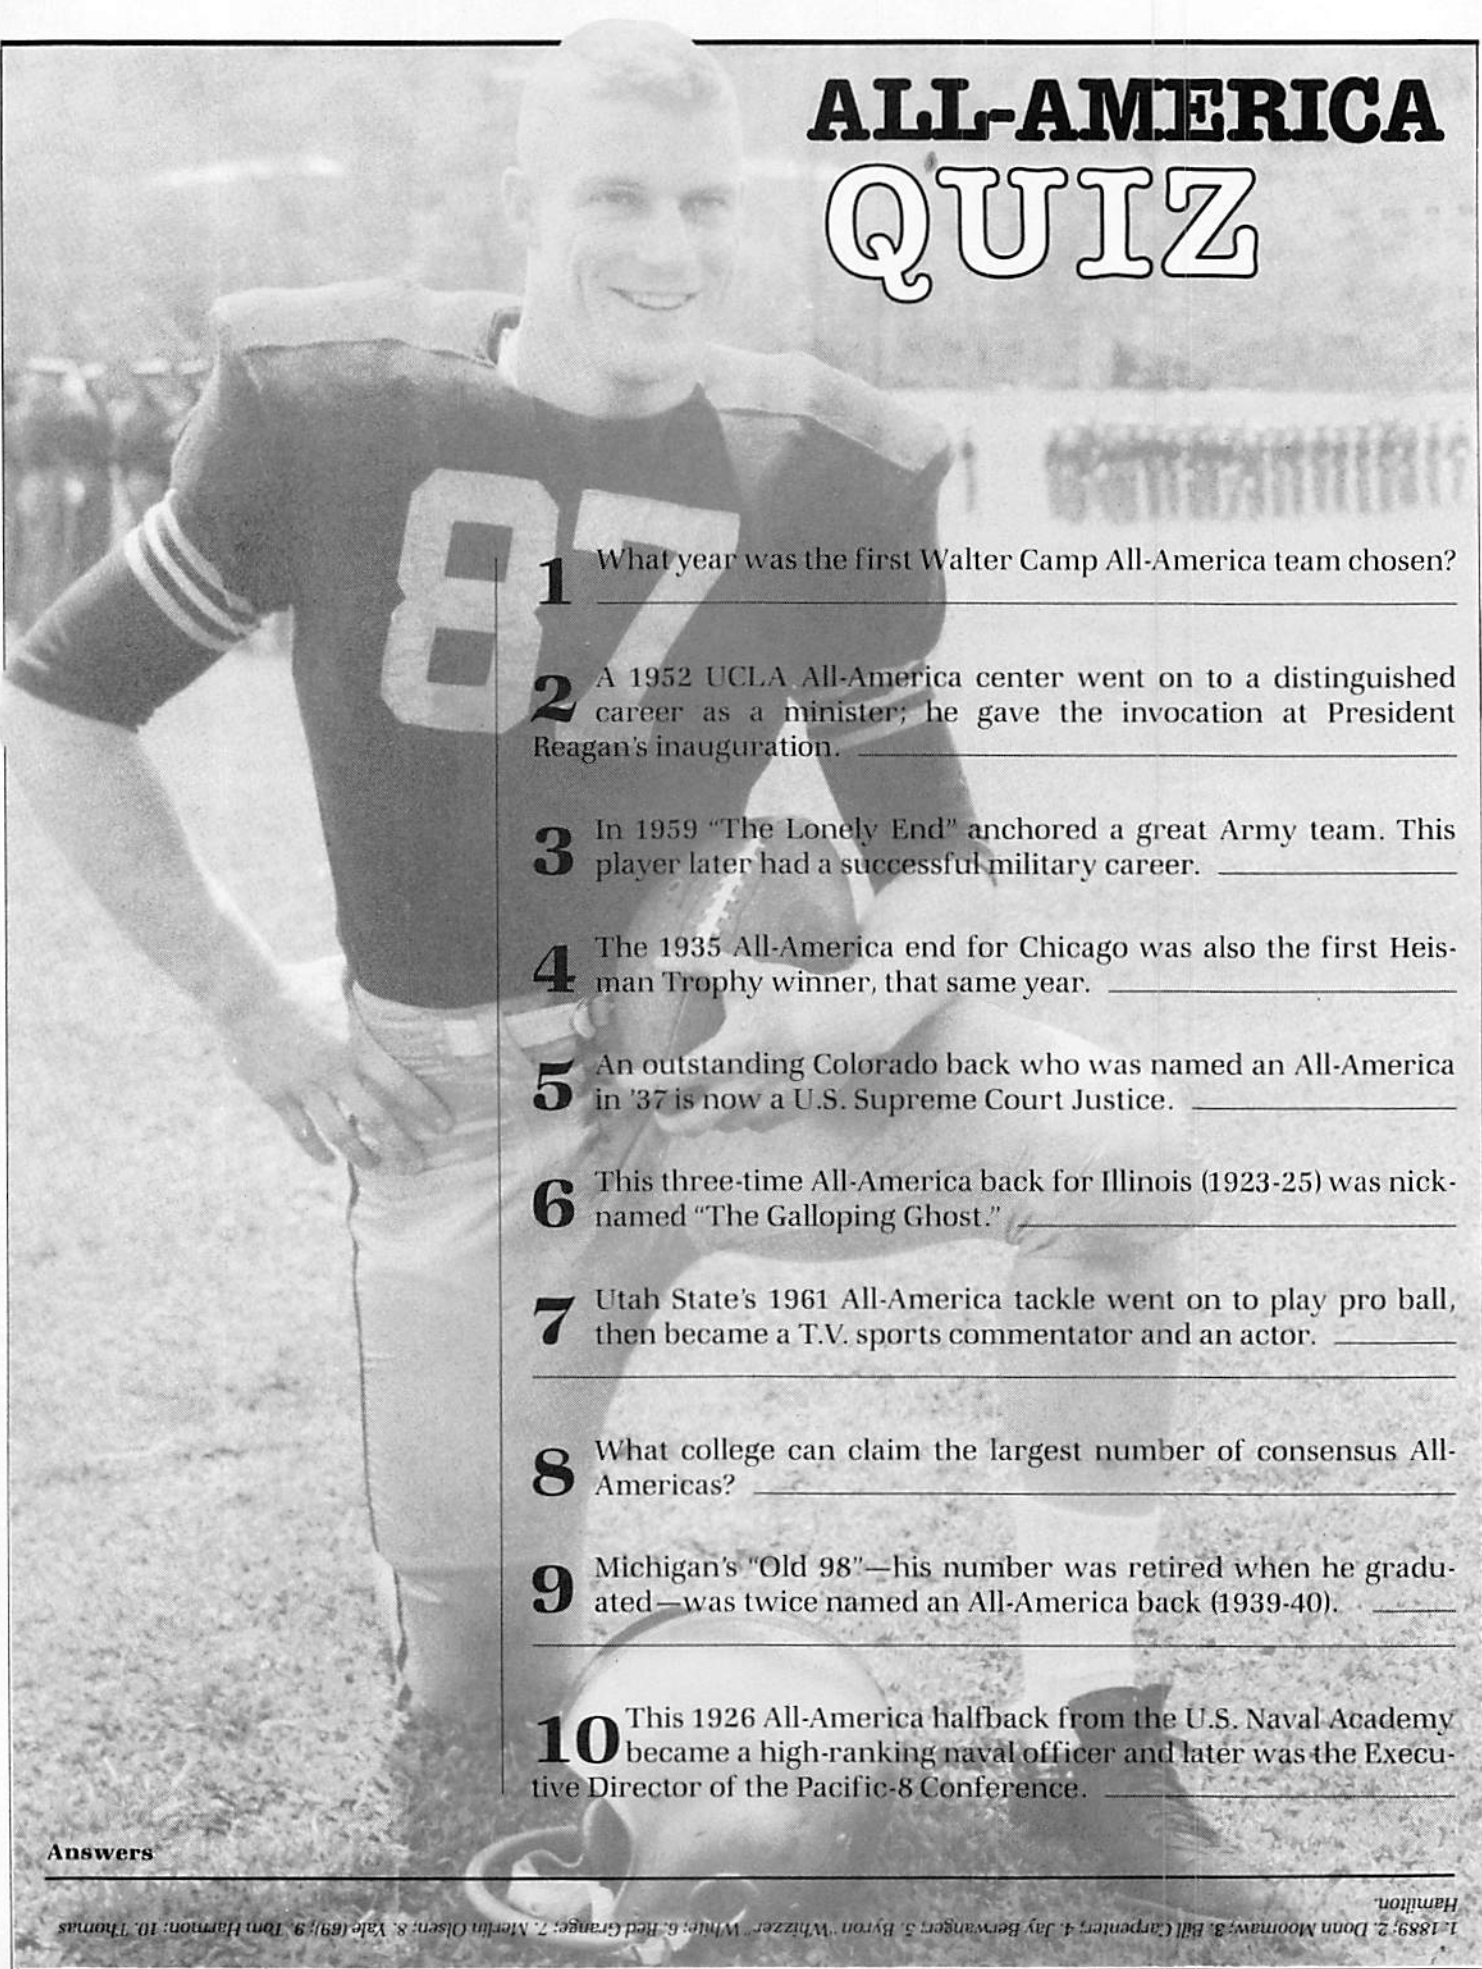

The free safety needs to be a bit of a cowboy—able to wrestle a runner to the ground.

In this complex computer printout world of ours,
isn't it nice to have an investment broker whose business revolves around
a simple expression of appreciation.

ALL-AMERICA QUIZ

- 
- 1 What year was the first Walter Camp All-America team chosen? _____
 - 2 A 1952 UCLA All-America center went on to a distinguished career as a minister; he gave the invocation at President Reagan's inauguration. _____
 - 3 In 1959 "The Lonely End" anchored a great Army team. This player later had a successful military career. _____
 - 4 The 1935 All-America end for Chicago was also the first Heisman Trophy winner, that same year. _____
 - 5 An outstanding Colorado back who was named an All-America in '37 is now a U.S. Supreme Court Justice. _____
 - 6 This three-time All-America back for Illinois (1923-25) was nicknamed "The Galloping Ghost." _____
 - 7 Utah State's 1961 All-America tackle went on to play pro ball, then became a T.V. sports commentator and an actor. _____
 - 8 What college can claim the largest number of consensus All-Americans? _____
 - 9 Michigan's "Old 98"—his number was retired when he graduated—was twice named an All-America back (1939-40). _____
 - 10 This 1926 All-America halfback from the U.S. Naval Academy became a high-ranking naval officer and later was the Executive Director of the Pacific-8 Conference. _____

IF GEESE WERE INVENTED TODAY, THEY'D BE WEARING THINSULATE® THERMAL INSULATION.

FOR CENTURIES, GEESE HAVE KEPT WARM THE SAME OLD WAY.

Feathers, feathers and more feathers. Fine, in their time. But now man has created something better. Thinsulate Thermal Insulation from 3M. A goose would be silly not to give it a try.

WE USE FIBERS, NOT FEATHERS.

Our special microfibers trap more air than most other insulations do. And that's the key to our amazing warmth. You see, the more air an insulator traps the better it works. True. And that means a half inch of Thinsulate Insulation is actually 1.8 times warmer than a half inch of down. Nearly twice as warm. In Thinsulate Insulation, a goose might not mind staying north all winter.

IT'S EASIER TO FLAP YOUR WINGS IN THINSULATE INSULATION.

Because it takes less of our insulation to keep you warm, you get a sleek, lean, racy look. Not bulky. In Thinsulate Insulation,

you can lead an active outdoor life. Freedom of movement from wingtip to wingtip.

OUR INSULATION ISN'T AFRAID TO GO NEAR THE WATER.

Should you happen to get it wet, don't worry. Unlike down, Thinsulate Insulation retains almost all of its insulating value under damp conditions. And it can even be machine washed or dry cleaned, depending on the garment's care instructions.

WHAT'S GOOD FOR THE GOOSE IS JUST AS GOOD FOR YOU.

The U.S. Navy Divers, the 1981 British Winter Expedition on Everest, and hard-working ski patrollers and instructors around the world use Thinsulate Insulation. Because it works for them. In fact, they've been shouting its

praises, from the highest mountain to the deepest sea. You will, too. When you're out in your element.

Just look for the Thinsulate Insulation hang tag on an assortment of clothing and accessories designed to keep you warmer.

For a free brochure, write 3M Thinsulate Insulation, Dept. TDI, Bldg. 220-7W, 3M Center, St. Paul, MN 55144.

GREAT QUARTERBACK-RECEIVER COMBINATIONS IN COLLEGE FOOTBALL HISTORY

by Nick Peters,
Oakland Tribune

Two pint-sized youngsters tossing the pigskin at Cedar Point, Ohio, on the shore of Lake Erie during the summer of 1913 didn't realize the impact their actions would have on the history of American football.

The rules had been liberalized to allow progress of the ball by passing, so Notre Dame seniors Gus Dorais and Knute Rockne were curious about placing the pigskin in the air.

They experimented during their idle hours while serving as lifeguards and restaurant helpers at a beach resort. The 5-7, 145-pound Dorais did the throwing to the 5-8, 145-pound Rockne, thereby forming the first great pass-catch combination the game has known.

"I don't know which one of us was first captivated by this new weapon, but we both saw tremendous possibilities in it,"

Gus Dorais was a passing wizard, with Knute Rockne on the receiving end.

Rockne recalled. "Once freed by changes in the rules, we worked on it as much as possible.

"It was truly work, too, because Gus had to learn how to pass the pigskin properly, and I had to learn to catch it without either one of us knowing what we were doing."

By the time 21-year-old Dorais and Rockne, a balding 25, returned to South Bend for football practice, they had be-

Knute makes a TD after the completion of one of the famous Dorais to Rockne passes which beat Army in 1913.

come adept at moving the football through the air, but it took the fourth game of the season to bring national attention to the exciting new offense.

Notre Dame visited West Point to face heavily favored Army, and a 25-yard touchdown pass from Dorais to Rockne helped the Irish to a 7-0 lead. The Cadets stormed back for a 13-7 edge, but a 35-yard toss—longest in history at the time—to Rockne set up a TD and Notre Dame had a 14-13 lead at the half.

Dorais finished with an incredible 14 completions in 17 attempts for 243 yards and the Irish posted a stunning 35-13 upset. "The Army players were hopelessly confused and chagrined," wrote *The New York Times*.

But the Cadets were resilient sorts. They learned from the humbling experi-

GREAT QUARTERBACK-RECEIVER COMBINATIONS

continued

ence. Army immediately incorporated the pass in its attack, bringing it to eastern football. The Cadets downed Navy, 22-9, using a passing game. Army quarterback Vernon Prichard and end Vernon Merrillat became a heralded combination and Merrillat earned All-America honors and distinction as "The Forward Pass King."

By 1916, Dorais and Rockne already were coaching and the Midwest had another crack pass-catch tandem in quarterback Arnold Wyman and All-America end Bert Baston of Minnesota. But there really wasn't another truly famous passing pair until 5-8, 172-pound quarterback Benny Friedman connected with rangy receiver Bennie Oosterbaan for Michigan in 1924-26.

Friedman fired an unprecedented 13 touchdown passes in 1925, six of them to Oosterbaan. In 1926, the two Wolverines hooked up to jolt Ohio State, 17-16. The pair easily was the most notorious passing combination of the Golden Age of Sports.

"It was the confidence we had in each other that made us so successful," Friedman explained. "Bennie would tell me exactly where he'd go. I knew he'd be there, and he knew I'd deliver the ball to that

point."

The most publicized pass in the history of college football also was unleashed in the Twenties. It was thrown by end Brick Muller of California and the 55-yard bomb to Brodie Stephens helped California shock Ohio State, 28-0, in the 1921 Rose Bowl Game.

That Muller threw the pass isn't so surprising. Quarterbacks of that era were more adroit in ballhandling skills than in firing footballs, so many of the longer passes were thrown by bigger, stronger teammates. The passing specialist behind center wasn't commonplace until the Fifties.

But there were some notable exceptions. In 1925, for instance, Friedman and Oosterbaan were tops, but Dartmouth's Andy Oberlander threw 11 touchdown passes, seven of them to Myles Lane. One year later, Stein Griggs of tiny Albright uncorked seven TD bombs of 55 yards or more, three of them caught by Sam Angle.

During the Thirties, the South and the Southwest got into the act, but it was an era of hype, so it's difficult to distinguish between fact and fiction. The most famous pass-catch combo of the time was

Alabama's Dixie Howell and Don Hutson, for instance.

But the 'Bama beauts actually hooked up for few touchdown plays during the regular season. They really didn't click big until the 29-13 Rose Bowl victory over Stanford in 1935. Howell was nine for 12, throwing for 160 yards, and Hutson caught six passes for 165 yards against the Indians.

"I ran like the devil and Dixie got the ball there," said Hutson, who was dubbed "The Alabama Antelope" and later became the greatest receiver of his time in the NFL.

Thirty years later, Tulsa's Howard Twilley would catch more passes in one game than Hutson did over a full season, so it isn't fair to compare the passing pairs of the first 50 years with the modern athletes who thrive in pro-style attacks of schools like Stanford, California, Illinois, San Diego State, San Jose State and Tulsa, to name a few.

Another duo highly publicized in the Thirties was the Yale combo of Clinton Frank and Larry Kelley. Each won a Heisman Trophy and they starred in a 23-20

continued

GREAT QUARTERBACK-RECEIVER COMBINATIONS

continued

victory over Princeton in 1936, but they really didn't connect on that many passes. Frank understood promotion; he later founded one of the nation's most successful public relations firms.

The most successful combo of the Thirties was Columbia's Cliff Montgomery and Anthony Matal, who collaborated on six scoring strikes of more than 25 yards in 1932. That same year, Purdue's Duane Purvis hit Paul Moss with four bombs of 50 yards or more.

Coach Dutch Meyer started using two split ends and two or three wingbacks at Texas Christian in the mid-Thirties, launching the fabled career of "Slinging" Sammy Baugh. As a result of the diverse nature of that wide-open attack, Baugh didn't have a favorite target, spreading the wealth among Will Walls, Rex Clark and L.D. Meyer.

Quarterback Davey O'Brien succeeded Baugh at TCU and continued to thrive in a pass-oriented system, but the finest combination of that time piled up yardage for Missouri. "Pitching" Paul Christman and James Starmer were a great pair in 1938-40, Christman throwing 25 TDs and Starmer catching 11, solid efforts even by

today's standards.

Clark Shaughnessy's T-formation awakened Stanford in 1940 and further revolutionized the passing game. But the Indians were neophytes in utilizing the air attack compared to what neighboring College of the Pacific had in store for football foes in 1946-49.

The legendary Amos Alonzo Stagg got things going with a pair of freshmen, quarterback Eddie LeBaron and end John Rohde, in 1946. The post-war boom turned into an aerial explosion for the California school. In four years, Little All-America LeBaron, only 5-7 and 165 pounds, fired 49 touchdown passes and Rohde was on the receiving end of 29 of them, making the two Tigers the most prolific pair in history.

Another Forties twosome, Mississippi's Charlie Conerly and Barney Poole, became the first to top the NCAA statistics in passing and receiving when it achieved the unique double in 1947. The 6-3, 225-pound Poole, who previously played for Army, had a season unprecedented in history when he hooked up with Conerly.

Whereas the crafty Conerly established national records with 133 completions

and 18 touchdown passes, Poole set records with 52 receptions and eight TD catches as Ole Miss won its first SEC championship. Poole also set a new single-game standard with 13 receptions against Chattanooga.

By 1950, those touchdown marks had fallen to the Kentucky combo of Babe Parilli and Al Bruno. Parilli fired 23 TD passes that year and Bruno caught 10 of them. Four years later, another double was posted when Cal's Paul Larson and Jim Hanifan were No. 1 in passing and receiving, respectively, with Larson tossing 10 TDs and Hanifan grabbing seven among his 44 catches.

The 1954 season began a wave of active pitchers and catchers. Navy had George Welsh and Ron Beagle. Len Dawson, a Purdue sophomore, registered eight TD passes against Missouri and Notre Dame in his first two varsity games and had an imposing target in 6-7 Lamar Lundy, but the pair didn't click to expectations in 1955-56.

Stanford achieved passing fame with Gary Kerkorian, Bobby Garrett and John Brodie in the early Fifties, but the Indians didn't have their first dual champions un-

GREAT QUARTERBACK-RECEIVER COMBINATIONS

continued

til quarterback Dick Norman and end Chris Burford led the nation in 1959. Burford caught six of Norman's 11 TD tosses, the pair climaxing the season in a Big Game loss to Cal. Norman completed 34 of 39 passes for a record 401 yards that day and Burford caught 12.

1963 when quarterback Don Trull won the passing crown and fired 12 TD passes, eight to Lawrence Elkins, who caught a record-setting 70 passes. But that season was just a tuneup for 1964, which featured four great pass-catch combinations from four different regions of the nation.

marks. One year later, with Bill Anderson doing the firing, Twilley obliterated all the receiving records with 134 catches for 1,779 yards and 16 TDs. He caught 19 passes in one game, 18 in another, and concluded his career with records that still stand: 261 catches, 3,343 yards and 32

QB Eddie LeBaron threw an historic 49 TD passes for Pacific in 1946.

End John Rohde caught 29 of LeBaron's throws.

Miami's George Mira gained headlines and records with his passes to Bill Miller in 1961 and to Nick Spinelli thereafter. Mira's accomplishments were rivaled by two Northwest combinations. In 1960, Washington State's Hugh Campbell caught a record 66 passes to lead the nation, also snatching 10 of quarterback Mel Melin's 11 TD passes.

By this time, great pass-catch combos virtually were an annual occurrence, so their impact diminished. In 1962, Heisman Trophy winner Terry Baker of Oregon State topped the nation in total offense and touchdown passes (15). Vern Burke, his favorite target, caught 10 of the scoring strikes and also led the nation with a record 69 catches for 1,007 yards.

Baylor produced double champions in

California boasted of Craig Morton and Jack Schraub, a combo which clicked when each starred for Campbell High in the San Jose Area. As seniors in 1964, the Golden Bears pair flourished. Morton completed 185 passes and Schraub caught 52 of them, not counting the winning touchdown for the West in a muddy Shrine Game. Morton's 185 completions would have been a new single-season record were it not for Tulsa's outrageous air show.

Jerry Rhome and the aforementioned Twilley, a sure-handed, 5-10, 185-pound receiver, swept to national honors. Rhome completed 224 passes for 2,870 yards and 32 TDs, all national records. Twilley was on the other end 95 times for 1,178 yards and 13 TDs, setting more

TDs.

The 1964 season also had Heisman Trophy winner John Huarte of Notre Dame throwing to Jack Snow, who grabbed 60 passes, including nine of Huarte's 16 TD tosses. At Florida State, Fred Biletnikoff latched on to 11 of Steve Tensi's 14 TD throws, not including a 13-catch, four-TD binge by Biletnikoff in the Gator Bowl victory over Oklahoma.

In 1965, the Anderson-Twilley outburst overshadowed a great Texas-El Paso tandem of Billy Stevens and Chuck Hughes, who caught 80 passes for 1,519 yards, including one dozen of Stevens' 21 TDs. The Missouri Valley erupted again in '66 with Wichita State's John Eckman leading the nation in passing and teammate Glenn

GREAT QUARTERBACK-RECEIVER COMBINATIONS

continued

Michigan QB Benny Friedman fired 13 TD throws in 1925.

Bennie Oosterbaan was generally in the right places to catch Friedman's passes.

Meltzer ranking No. 2 with 91 receptions for 1,115 yards.

Other great combinations of the mid-Sixties included BYU's Virgil Carter and Phil Odle, who in 1965-66 caught 106 passes, 16 of them for TDs. At Purdue, Bob Griese threw 12 TD passes in 1966, eight of them to Jim Beirne, who caught 64 that year.

Sophomores Terry Hanratty and Jim Seymour gained national attention with an 84-yard bomb against Purdue in 1966. By the time the Notre Dame duo called it quits in 1968, it had joined forces for 16 TD passes. Two other star receivers of that era, SMU's Jerry Levias and Florida State's Ron Sellers, didn't care who was firing.

Levias, the first black to play in the SWC, caught seven of Mike Livingston's 10 TD passes in 1967. One year later, the SMU senior snared 80 passes for 1,131 yards and eight TDs from sophomore slinger Chuck Hixson. Sellers, meanwhile, caught 212 passes for 23 TDs in 1966-68, becoming the favorite target of three different QBs: Gary Pajcic, Kim Hammond and Bill Cappleman.

College football celebrated its 100th birthday in 1969, and some famous combinations put on a centennial air show. It began in a sensational season opener pitting heavily favored Houston against Florida, which introduced a new battery in

sophomores John Reaves and Cuban-born flanker Carlos Alvarez. Their first play was a 70-yard touchdown bomb, triggering a 59-34 upset. Reaves topped the nation in passing with 222 completions and 24 TDs. The 5-11 Alvarez caught 88 balls, 12 for TDs.

Purdue's Mike Phipps threw 23 TD passes in '69, Ashley Bell grabbing 11. At nearby Notre Dame, Joe Theismann and Tom Gatewood enjoyed a great hookup in 1969-70, Gatewood clutching 15 of Theismann's 29 TD passes. The 1970 season unveiled a fabulous combo for Air Force. QB Bob Parker completed 199 passes for 2,789 yards and 21 TDs. Ernie Jennings was on the receiving end 74 times for 1,289 yards and 17 TDs.

The South produced two great combinations in the early Seventies. Auburn's Pat Sullivan earned a Heisman Trophy throwing to Terry Beasley. In three years, Sully fired 53 scoring strikes and Beasley camped under 29 of them. At FSU, Gary Huff and Barry Smith enjoyed similar success. Huff in three years totaled 52 TD passes and Smith caught 25. At the same time, Heisman Trophy winner Johnny Rodgers was making life easier for Nebraska QBs Jerry Tagge and David Humm.

But the passing emphasis clearly had followed the lead of Stanford, Cal and San Jose State and moved West. San Diego State made it a foursome with QB Dennis

Shaw throwing to Tom Nettles in '68 and Tim Delany in '69. Brian Sipe tossed 40 touchdown passes in 1970-71, 25 of them gathered by Tom Reynolds for coach Don Coryell's Aztecs.

Stanford rose to prominence with Heisman Trophy winner Jim Plunkett, who formed great combos with Gene Washington and Randy Vataha. The Stanford tradition continued with quarterbacks Guy Benjamin, Steve Dils, Turk Schonert and John Elway throwing to prime receivers like James Lofton, Tony Hill, Ken Margerum and Darrin Nelson.

BYU's Gary Sheide followed in Carter's footsteps and was the nation's second-ranked passer in 1973, completing 177 for 22 TDs. Teammate Jay Miller topped the receivers that year, catching 100, including 22 in one game against New Mexico. Jim McMahon kept the Cougars on top in 1980-81, firing 77 touchdowns to crack receivers like Scott Phillips, Clay Brown and Gordon Hudson.

SMU's Mike Ford and Emanuel Tolbert sparkled in 1977-78, Ford flipping 28 TDs and Tolbert catching 17 of them. And at Purdue, not far from where Dorais and Rockne made it all possible 66 years past, Mark Herrmann and Dave Young provided an effective pass-catch combo in 1979-80. Hermann threw 39 TD passes those two years and Young was the recipient of 17 of them.

OLYMPUS

*Across the fields of yesterday
he sometimes comes to me
a little child just back from play
the child I used to be.*

Introducing the Olympus OM-G. Created for people who bring poetry to their pictures.

At Olympus we believe there are some people who do more than just take pictures. They create them.

It is for these people that we created the new Olympus OM-G. A camera with every technical feature designed for a specific creative function. With advances like the brightest focusing screen, and the strongest, lightest body in its class.

A camera that's easy to

use, because it's fully automatic when you need it to be, and totally manual when you want it to be. So not only can you capture what you see, but what you feel. A camera that, as your creative needs grow, grows with you.

For more information, see your Olympus dealer. Or write Olympus, Woodbury, NY 11797. In Canada: W. Carsen Co. Ltd., Toronto.

The new Olympus OM-G. Because some people create poetry without words.

OLYMPUS®

When you have more to say
than just smile.

THE SALES PROS AT FOOT LOCKER. EXPERTS EVEN THE EXPERTS LOOK UP TO.

"When I play basketball I know the right shoes to put on my feet. But now I'm into other sports, too. So I came to Foot Locker because only Foot Locker has all the top name sport shoes for most every sport in all styles and sizes.

"What I found out is that the Foot Locker salesmen—the guys in the striped shirts—know sports and sports shoes like I know basketball and basketball shoes. And that's saying something. Real pros, those guys!"

Wilt Chamberlain

Foot Locker.

Ray Morrison

*by Galyn Wilkins,
Fort Worth Star-Telegram*

He lived 97 active and fruitful football seasons. And sometime about the 60th or 70th, the profession should have passed him and left him in its high-tech dust.

After all, Ray Morrison coached football before the invention of artificial turf, domed stadiums, white shoes, air-conditioning and 10-man coaching staffs. And before Joe Namath, who generally is believed by the modern generation to have invented the forward pass.

Listen, children, Ray Morrison was throwing the football when it looked, felt and smelled like a pig's hide and when it was shaped like a watermelon. Out of his mathematician's mind came a shotgun spread of receivers as well as the trap play, a geometric piece of engineering that remains today a staple in all playbooks.

He stationed two ends wide on the scrimmage line—split receivers they are called today, and their intricate patterns

dazzled fans and opposing coaches from West Point to Seattle.

If he didn't invent modern football back in the 1920s and 1930s, he was at least its godfather. He was far ahead of his time and Southern Methodist and the Southwest Conference haven't looked back since.

Morrison was SMU's first coach, arriving in 1915, and when he left for Vanderbilt in 1935 he left the motor running. For three decades after his departure the SWC was known coast to coast as "the aerial circus."

Morrison's fast and bold tracks were followed by some of football's most famous aviators—Sammy Baugh and Davey O'Brien at TCU, Fred Benners and Don Meredith at SMU and Bobby Layne at Texas. Inventive coaches took over where Morrison left off in the SWC, coaches like Matty Bell at SMU, Dutch Meyer at TCU and Homer Norton at Texas A&M.

continued on page 38

The Lombardi Award is named for coaching legend Vince Lombardi and is given annually to the college football lineman whose outstanding performance and ability are combined with a quality revered by Coach Lombardi—discipline.

Four finalists are chosen each year by a committee consisting of 100 college coaches, sportswriters and sportscasters throughout the country.

The award winner is selected in three steps. First, each committee member nominates four candidates, and the twelve players gaining the most votes become semi-finalists. Then, from these twelve, voters pick their top four choices, and the four with the most votes become finalists. In the third and final step, the player with the most votes wins the award.

When deliberating over the award nominees, each member of the selection committee must be assured of the player's exceptional performance on (and off) the field, his unyielding discipline and his hard work and dedication.

Discipline is so much a part of the Lombardi Award qualifications that the word is inscribed on the award itself, which was created by artist Mark Storm in 1970. The trophy is a 40-pound block of granite mounted on a pedestal—representing Vince Lombardi, who at 5-8, 185 pounds was the smallest, but by no means the least, of the legendary Seven Blocks of Granite at Fordham University from 1934-37.

At the award dinner, sponsored by the Rotary Club of Houston, the Lombardi Award finalists are honored and the winner is named. Proceeds from this dinner are donated to the American Cancer Society; the money funds research to find a cure or control for cancer, the disease which took Coach Lombardi's life in 1970.

PRESENTED BY THE ROTARY CLUB OF HOUSTON to the college lineman who in addition to performance best exemplifies the discipline of the late Vince Lombardi.

1970—Jim Stillwagon Ohio State
 1971—Walt Patulski Notre Dame
 1972—Rich Glover Nebraska
 1973—John Hicks Ohio State
 1974—Randy White Maryland
 1975—LeRoy Selmon Oklahoma
 1976—Wilson Whitley Houston
 1977—Ross Browner Notre Dame
 1978—Bruce Clark Penn State
 1979—Brad Budde USC
 1980—Hugh Green Pittsburgh
 1981—Ken Sims Texas
 1982—Dave Rimington Nebraska

Ray Morrison

continued from page 35

Morrison coached at Vanderbilt and Temple and was 64 when he was offered the coaching post at Yale. He declined and came back to Texas, coaching well into his 70s at Austin College, a small, scholarly school in Sherman, a Yale on a small scale.

When he retired, he moved back to Dallas. He lived near SMU and watched football practice almost daily until he died in October, 1982. He loved practice, his sharp, mathematics-geared mind feeding on the repetition and the attack of numerical strengths and weaknesses.

"After all," says George Koontz, a player and close friend until Morrison's death, "he loved math and taught it for years."

A retired attorney, Koontz was one of those wide ends for Morrison at SMU. Morrison made such an impact with his aerial magic that Koontz later joined the Air Force.

All coaches, the good and the failed, the

Matty Bell, then at TCU and Morrison's successor in 1935, tried to explain: "If Morrison's teams couldn't score, they weren't going to let your team score. He was that tough a coach."

The measurement of Morrison's career goes beyond debits and credits in the won-loss column. The bottom line, according to Koontz, shows that Morrison turned kids into responsible adults. He never met a kid he couldn't coach, or wouldn't.

"He always had a uniform," Koontz said. "No one was turned away. And every player was a member of the team. He never let us forget the team concept and he always coached that way. He never coached just the defense or the offense, but always the team."

The son of a minister, Morrison was headed for a pulpit until he discovered he was a shy orator. He decided to capitalize on his talents as a football player. He applied at SMU, then on the outskirts of Dallas. He was hired at \$200 a month and also had to teach math.

There was one other condition.

"He had to build the football field," says Koontz. "When he arrived, the president showed him a cotton field and told him to turn it into the football field."

Morrison borrowed a plow and a team of horses and went to work. The field turned out well and eventually became a 30,000-seat stadium. His first team turned out 2-5. His second team turned out worse, 0-8, and Morrison was fired.

Five years later, Morrison was back and put the Southwest Conference and SMU on the map. He took the Mustangs to the East, where the press looked upon them as a wild-west exhibit. He took them to the West Coast, where the press looked upon them as a delightful new invention.

"No one had ever seen teams throwing from their own end zone," says Koontz. "If a team threw any time but third and seven it was radical. Other teams threw in desperation, but Morrison's teams threw with a purpose. We threw on first down, second down, fourth down and from anywhere on the field."

SMU went to Notre Dame a 33-point underdog in 1930 to face Knute Rockne's last team, and one of his best. On their first two plays, the Mustangs threw passes, the second one for a touchdown. The game rocked along evenly until the last five minutes when Notre Dame wired together a drive and scored the winning touchdown—on a pass.

"One unforgettable facet of Morrison was that he never let a bad play or a close loss bother him or the team," says Koontz. "It hurt to lose that game at Notre Dame, but we got over it. That was the mathematician in Morrison. He knew there

would always be another problem ahead to solve."

Ahead was a trip to Annapolis to play Navy. Another problem, another solution.

"He devised a unique plan," Koontz remembers. "He had the two ends run down the sidelines. The two halfbacks went deep in the middle. Then we threw a little pass over the middle to the fullback. He caught the first one we tried and ran for a touchdown. It was completely unexpected by Navy—but that was Morrison. You had to expect the unexpected from him. We won that game 20-7."

Morrison was sending four and five men downfield on pass patterns in the era of the single wing and Notre Dame box. Thus he not only had to have a quarterback who could look around for open receivers, but a line to provide the time to search.

"Morrison had the ability to teach a quarterback to see the entire field," says Koontz, "but another secret was his great lines. He liked to take high school fullbacks and make guards and tackles out of them. That meant they were agile and could pull and lead interference."

Also in the Morrison repertoire was the Statue of Liberty play, which he had first used in a moment of desperation as a Vanderbilt quarterback trapped on his own goal in 1915, and the mousetrap play, called simply the Trap in modern playbooks.

"We also had a play where the right guard pulled and led the fullback through a hole at left end," Koontz recalled. "Only, we had a terrible time learning it right because the fullback kept running into the guard. So, Morrison had the fullback take the snap and ground the ball, as if he had fumbled it. By the time he picked it up the guard was out of the way and leading interference. That became known around the country as the 'SMU Fumble Play'."

All of these teachings and innovations were transmitted quietly by a coach who talked on the field as if he were in a library.

"It was conversational," Koontz says. "He simply talked to us and we talked to him. We had an open invitation to make suggestions. He never cursed or raised his voice and he seldom used a whistle—a student manager always walked around behind him carrying it."

"In this way he taught us to have confidence in ourselves and our teammates. He taught us to expect to win, but to always play as sportsmen."

Morrison's men won and they lost and then they went on to the next problem.

On the way, Koontz will always remember, "we played hard, we played 60 minutes and we had fun. Coach Morrison made it fun."

Ray Morrison enjoyed watching SMU's football practice after retiring from coaching.

lucky and the unlucky, are remembered mostly by their numbers. If numbers are the criteria, Morrison will be remembered as a success, especially in the SWC.

Three of his SMU teams were undefeated and won conference championships. An oddity Morrison could never explain, by addition, subtraction or algebra, was the 1929 season in which the Mustangs played four ties, two of them scoreless. They won six and lost none.

Foster Family, meet pothole #42, route 12.

THE BUMP STOPS HERE.

Monroe® GasMatic.™ For a comfortable small car ride.

Here's great news for the Foster family and every other small car owner. The Monroe Gas-Matic shock absorber is here. Gas-Matic is an advanced small car shock that features a sealed-in, low-pressure gas charge to cushion the small car ride against bumps, potholes, tarstrips, and other small car road hazards. It helps eliminate ride harshness, road

noise, and shock fade better than conventional shocks. The ride is so good, we cover the Gas-Matic with our famous Monroe Ride Offer: "If in 60 days you don't agree Gas-Matics give you the best ride ever, Monroe will replace them, at no charge, with any comparably priced shock."

So, if you've been getting creamed by bumps and potholes, put a cushion between you and the road. With a set of Gas-Matics for your small car. And say good-bye to bump #42... #43... #44. See your Monroe retailer today. The bump stops there.

Small Car America Rides Monroe.

MONROE® 60 DAY RIDE OFFER

If in 60 days you don't agree Gas-Matics™ give you the best ride ever, Monroe will replace them at no charge, with any comparably priced shock!

In the Big 10 . . .

FOOTBALL IS A "HAPPENING"

Big Ten football is not just a game, it's a happening! And as the Conference kicks off its 88th season of intercollegiate gridiron competition, this 'happening' has never been more exciting.

The spectacle of big time college football — the Big Ten brand — has caused millions of people all across the nation to focus their attention on their favorite Big Ten team. Big Ten universities boast more living alumni than any other conference in the nation. It should then come as no surprise that the Big Ten has led all conferences in "turning the turnstiles" for over a quarter century.

Football Saturdays at Conference campuses reflect the intense, almost carnival-like atmosphere of Big Ten gridiron zealots. From State Street in Madison to High Street in Columbus — all across the seven state Big Ten geographical area — Big Ten football lives and breathes in the millions of supporters that have made it famous.

And what can college football's most dedicated followers expect in 1983? A capsule outlook of each team follows:

Now that record-setting quarterback Tony Eason is displaying his talents in the National Football League, Illinois coach Mike White will have to rely on a trio of untested players to fill the all-important quarterback position. Word has it that talented Jack Trudeau will get the starting nod — U-I folks say that Trudeau could erase Eason's records almost as easily as Eason erased former Illini Dave Wilson's standards. But the Illini defense will likely go a long way in determining the team's fortunes, with nine starters from 1982 returning to that unit. The running game, with Dwight Beverly and Thomas Rooks, looks to be much improved, too — four of the team's top five rushers from a year ago are back.

Indiana, like the Illini, will look to a trio of unproven players to man the signal calling duties left vacant with the departure of Babe Laufenberg. The Hoosiers do have the luxury of flashy Duane Gunn, a certain all-America choice at the wide out spot. And with rookie coach Sam Wyche, a disciple of the Bill Walsh free-wheeling style of offense, at the helm, Indiana will add to the reputation of "top heavy in the passing department" that the Big Ten has earned in recent years. The team's top four rushers are back, led by Orlando Brown (580 yds., 6 TDs).

Fifth-year coach Hayden Fry coined the 1982 Hawkeye season as one of his "most satisfying ever". With 15 starters returning from that Peach Bowl championship team — nine on offense and six on defense — this year's Iowa squad is considered a serious threat for the Con-

ference title. Versatile Chuck Long directs an offensive attack that returns its four top rushers, including Eddie Phillips, the Big Ten's top returning runner (806 yards). The receiving corps is deep, led by Dave Moritz (41 catches, 14.8 avg.). Naturally the defense will be strong. The past two seasons, the Hawks won eight games that were decided by a touchdown or less. Sophomore Larry Station at linebacker and Dave Strobel at end are certain to gather all-league honors.

At Michigan, there will be no more exhibitions of grace, speed and quickness from three-time all-America Anthony Carter. But the Wolverines return a strong team (38 lettermen) nonetheless as Bo Schembechler goes after his 11th Conference title (shared or outright) since coming to Ann Arbor. Veteran QB Steve Smith is at the helm, and will be flanked by a host of highly-touted running backs with limited experience. A pair of all-Americans — Tom Dixon and Stefan Humphries — add support on the offensive line. They are also academic all-Americans. Defensively, linebackers Mike Boren and Carlton Rose may be among the best in the Big Ten. All Sincich and Kevin Brooks up front are quick and strong.

New Michigan State coach George Perles will rely on a strong group of incoming freshmen to help fill the gaps left behind by a disappointing 2-9 campaign last season. Only eight starters return. Perles, former defensive coordinator for the Pittsburgh Steelers, has an all-America in 6-6, 233-pound linebacker Carl Banks, quite possibly the league's top defensive performer. Dave Yarema, who led the Spartans to their two wins in the final four games last season, will likely be the quarterback. The kicking game may be the league's best, with preseason all-America Ralf Mojsienjenko handling both place kicking and punting chores. Freshman linebacker Shane Bulough could likely be a name familiar around the league at the end of the season.

Minnesota lost its final eight games of the season after a 3-0 start. Coach Joe Salem revamped his coaching staff in preparation for revamping his team. For the Golden Gophers to have a successful season in 1983, they will have to bring along many younger players and avoid the key injuries that knocked them out of contention in 1982. Biggest question is at quarterback with the departure of record-setting Mike Hohensee — Greg Murphy or Andy Hare will likely get the call. But the tailback slot with Tony Hunter, and the flanker position with Dwayne McMullen, are strong. Center Randy Rasmussen

is solid and may be the Big Ten's best. Middle linebacker Peter Najarian emerged last season as a defensive standout, and will likely be named to Big Ten honor teams in his junior year.

Few doubt that Northwestern may have been the Big Ten's most improved team in 1982. Ending losing streaks is one thing, maintaining upward progress is another. The Wildcats this year will likely continue making progress, with a league high 19 starters returning. Quarterback Sandy Schwab burst on the scene last season. So did tight end Jon Harvey, tailback Ricky Edwards and split end Todd Jenkins, all of whom are back. Defensively the 'Cats are bigger, stronger and quicker — 10 1982 regulars are back. Dennis Green was Big Ten "Coach-of-the-Year" in 1982. Conference teams now heed the call: you can't jump on Northwestern any more.

A seven-game winning streak awaits Ohio State in 1983, one of the longest in the nation. Few teams played better at the end of 1982 than Ohio State. Thus the reason for optimism in Columbus for Buckeye fortunes in 1983. With the emergence of Mike Tomczak at quarterback, the forceful running of fullback Vaughn Broadnax and a strong support cast on the offensive line, OSU will likely be a power to be reckoned with this season. Defensively the Buckeyes stack up among the league's best, with Roland Tatum now at inside linebacker and four returning starters in the backfield. Offensive left tackle Bill Roberts, an all-America choice, anchors what Earle Bruce calls the biggest offensive line he has had at Ohio State. There's little experience at tailback, but that's a situation OSU adequately faces every few years — 1983 is no different.

A Big Ten sleeper in 1983? It could be Purdue. With 11 starters and 46 lettermen from 1982 the Boilers, under sophomore coach Leon Burnett, should make some noise and dramatically improve on last year's dismal 3-8 mark. Quarterback Scott Campbell will continue to climb the league's career passing and total offense charts, while throwing the ball to tight end Cliff Benson, touted by many NFL scouts as perhaps the nation's best prospect. Last year's top eight rushers return, led by Mel Gray (916 yards). Last year's top five receivers return. Defensively, Brock Spack is the league's #2 returning tackler (127 stops). Chris Scott, Andy Gladstone, Ray Wallace and Don Anderson could reap all Big Ten honors in '83.

(This article was written by the Big Ten Service Bureau, Mark Rudner, Asst. Director.)

"LIKE FATHER, LIKE SON" A GOPHER

Captain Randy Rasmussen is following in the footsteps of his father, Bob. Some have said it is a classic example of "Like Father, Like Son." Others simply maintain that Randy is a chip off the old block.

No matter how it is put, the dynamic duo of Randy and Bob Rasmussen has been a good one, and Gold Country has benefited because of them.

Bob won Varsity "M" awards at the University of Minnesota in 1955-56-57. As a senior, he was listed on the roster as a 5-10, 203-pound right guard.

A three-year starter for the Golden Gophers, Bob was the Minnesota player featured in the Gopher Goal Post souvenir program for the Northwestern game (it included an autographed photo page!) during the 1976 season.

Here's what a thumbnail sketch had to say about Bob:

"RASMUSSEN, ROBERT FRANCIS (Ras) — guard — graduated from Minneapolis De LaSalle High School in spring of '53 . . . won letters there in football, hockey, baseball . . . hopes to get a degree in education . . . secret ambition is to be a professional wrestler . . . hobbies are woodcraft, golf, archery and tennis."

What that sketch didn't say was that as a prepster at De LaSalle, Bob was an all-conference and all-state performer, and that he was selected to play in the high school all-star game after his senior season.

Following three outstanding seasons as a regular guard for the Golden Gophers, Bob was drafted by the Baltimore Colts. He chose instead to play in Canada and spent one season with Vancouver.

Meanwhile, Bob also realized that college "secret ambition" and wrestled professionally from 1958 through 1962.

Since his days of athletic competition ended, Bob has been a solid member of the Twin Cities business community and currently is owner and president of a food brokerage Company here.

Randy's thumbnail sketch, in the 1983 University of Minnesota media guide, is remarkably similar to the '57 view of his dad. . . . except that Randy has "grown up" to 6-2 and 262-pounds.

It points out, for example, that Randy also was a fine prep athlete and won letters in track and football at Irondale in New Brighton. Besides being an all-conference performer there, Randy earned all-state honors as a senior. Like father, like son!

Randy played center his first year at Minnesota but then was moved to guard . . . just like his dad . . . and started there as a sophomore and a junior.

Last spring Coach Joe Salem moved Randy back to center, and while the cur-

Bob Rasmussen as a '57 GOLDEN GOPHER

rent Gopher captain maintains that he likes the center post best, he did admit that "It was kind of neat playing the same position as my father."

That closeness, between father and son, is evident when talking to either Randy or Bob. And it is easy to see why Randy has become a chip off the old block.

"My dad used to take me to all the Gopher football games when I was a kid," Randy recalls, "and when I got into high school, the tradition was set and I'd go over to Memorial Stadium with my Irondale teammates to see Minnesota play."

There was no doubt in Randy's mind, therefore, that if he was going to be good enough to play college football, it would be in Gold Country.

"I knew about my dad playing at Minnesota," he says, "and I wanted to do the same. When the opportunity came along to be a Golden Gopher, I jumped at it."

While there have been a few graduates of Minnesota high schools who have opted for other schools such as Iowa or even Nebraska, Randy is completely pleased that he "stayed home" and attended his state university.

"We were disappointed in the way things went for us last year," Randy admits, "but I will never regret attending the University of Minnesota. It is a great

school, and I am getting a great education. Being a part of the Minnesota football program has been a very good experience."

Father Bob, who felt the same way about attending the University of Minnesota, has been even more pleased that his son is part of the same scene.

"I feel that it has been a great honor for us to have Randy play at Minnesota," Bob said, "and it certainly has been a personal thrill to see our son achieve what he set out to do as a young boy."

How has it happened? "I believe," Bob says, "that Randy has been a devoted and dedicated individual. He loved to play football, and we feel that his hard work, in lifting weights and in running, have been the reasons for his success."

Hopefully that success is not over. While most of the prognosticators tab Minnesota for a 10th place finish in the conference, Randy maintains it won't happen.

"We have some good players on this team," he maintains, "and we have a good, together feeling. We'll win some games. We'll surprise some people."

It's that kind of dedication and determination . . . in father and son . . . that has made the Rasmussens such a dynamic duo!

1983 UNIVERSITY OF MINNESOTA FRESHMEN — Row One: Steve Thompson, Anthony Burke, Duane Dutrieuille, Melvin Anderson, Troy Jackson, Donovan Small, Doug Mueller, Paul Carlson. Row Two: Mark Dusbabek, Brett Sadek, Alan Keim, Gary Pegues, Joe Blake, Jeff Kyle, Keith Richter, Norries Wilson. Row Three: Brad Howe, Kevin Wilson, Ray Hitchcock, Dan Rehtin, Travis Mitchell, Jim Holzheimer, Doug Martin, Erik Fors, Paul Hritzko.

St. Paul, MN 55101
(612) 298-3500

The Metrodome.

The hungrier you get, the better it looks.

At first glance, it appears to be a saucer-shaped concrete structure with a fabric roof.

Upon prolonged viewing, however, it's possible that certain perceptual changes may take place.

These changes might be rather subtle at first and could be attributed to shifting patterns of light.

This would not, of course, explain the appearance of such phenomena as lettuce, tomato and onion.

In this case, it is apparent that the viewer has reached a state of acute hamburger deprivation.

Fortunately, there is a Burger King® Restaurant nearby. There's one in the Pillsbury Center at 5th Street and 2nd Avenue. And another at 8th and Hennepin. As a precautionary measure, we suggest you pop in and pick up a sack of burgers before approaching the saucer-shaped structure.

CIMARRON '84 THIS ONE'S GOT THE TOUCH.

The Cadillac touch. It's everywhere. You can feel it when you put Cadillac's road-hugging Touring Suspension to the test. You can see it ... inside and out. From leather-faced front buckets with lumbar support to a hand-buffed exterior finish. It's attention to detail, too. Like push-button air. And aluminum alloy wheels. You've got to drive this car...and experience the Cadillac touch. Cimarron '84.

BEST OF ALL...IT'S A CADILLAC.

Let's Get It Together...Buckle Up.

About Tonight's Guests . . .

Tonight the University of Minnesota takes on the nation's best when hosting number one ranked Nebraska here in the Hubert H. Humphrey Metrodome.

It will be a severe challenge for the youthful Golden Gophers, and the invading Cornhuskers rank as heavy favorites.

Minnesota fans may remember, however, that the last time the Golden Gophers entertained a number-one ranked football team they upset mighty Michigan 16-0 (that was in 1977) to knock the Wolverines out of the top spot.

And while U of M fans may hope for a repeat performance in the home opener tonight, chances seem slim against the powerful Huskers.

Prior to the start of the '83 campaign, Nebraska Sports Information Director Don Bryant said, "Anyway you slice it, 1983 is going to be a long football season for the Nebraska Cornhuskers."

Bryant was alluding to the fact that Coach Tom Osborne gathered his flock on August 6 for the start of fall drills and the finale for Nebraska is scheduled November 26 against Oklahoma. On top of that, Bryant pointed out, Nebraska has "gone a-bowling" annually since 1969, and odds would indicate that the Huskers will be in action well into December and possibly January if they successfully defend the Big Eight championship they've won the past two years.

The reason for the early start was Penn State, a highly-touted team in its own right, an opponent Nebraska destroyed 44-6 on August 29 in the New Jersey Meadowlands.

Then last week Osborne brought his club home to Lincoln where it riddled Wyoming 56-20 to make it 2-0 for Nebraska coming into tonight's contest.

Despite the length of the season, there seems to be a bright side to Coach Osborne's situation, and therein lies the root of optimism that prevails in Lincoln.

"We'll have a good team, possibly a very good team," Osborne has said more than once during the summer. "We have a lot of fine players back and some very promising young players, but we won't know how good we can be until things get rolling in the fall. We do know we will miss a lot of players from the 1982 team who did an outstanding job for several years."

Last year Nebraska led the nation in most offensive categories, but particularly in rushing, total offense and scoring. A whale of a lot of the fire power returns, but a whopping number of the hole-openers must be replaced if the Huskers are to approach 1982 dimensions.

Osborne doesn't back off from bragging about his backfield talent, calling it the best material he's had during his 11 impressive years as Nebraska's head

Bob Devaney
Athletic Director

coach. Turner Gill returns at quarterback after racing away with All-Big Eight honors the past two years. I-back Mike Rozier shattered the Nebraska single-season rushing record last fall—in the first nine games, that is—enroute to consensus All-American recognition. His 1,689 yards ranked No. 4 in the nation and he's the top rusher returned among 1982 Heisman Trophy vote-getters. Irving Fryar, rated by many experts as the top receiver in the nation, returns at wingback, the spot where he's starred for the past two years.

Fullback Mark Schellen, a power runner with blazing speed, makes the No. 1 backfield appear formidable, indeed, and the depth picture is bright, too. Nate Mason, a two-year letterman, and Craig Sundberg, a one-year letterman who sparkled in the spring, will keep Gill hustling. Jeff Smith, who had a sensational sophomore season in 1982 when he posted a 10.2 average and gained 569 yards, makes I-back a solid position. A pair of talented sophomores, Paul Miles and Doug DuBose, could also enter the picture.

Shane Swanson and Jim Thompson both lettered at wingback in 1982, so Fryar can have capable relief, and letterman Tim Brungardt and soph Tom Rathman are solid fullback performers.

Up front, Osborne and Co., are rebuilding and the spring films show progress was made on replacing Randy Theiss, Mike Mandelko and Jeff Kwapick in the line. Steinkuhler, who led the grading in 1982, no longer is in the shadow of upperclass superstars, and senior Scott Raridon has lettered twice while playing very well as an alternate. That makes the right side solid, and the left side has lettermen John Sherlock at tackle and Harry Grimmering at guard, and the depth is

Tom Osborne
Head Football Coach

good with lettermen Mark Behning and Anthony Thomas still very much in the picture.

How about center? With Rimington gone—along with two Outland Trophies and the 1982 Lombardi Award—the hole looked big. But Osborne shifted alternate tackle Mark Traynowicz, who starred in relief against LSU in the Orange Bowl, to center and the hole doesn't look quite so big. Maybe that's because Traynowicz is 6-6 and 260 pounds with fine mobility and a heap of aggressiveness. Letterman Brad Muehling is also on hand.

Tight end remains a question mark, with only letterman Monte Engebretson boasting back-up experience. Three letterman line up at split end, Ricky Simmons, Scott Kimball and Scott Schoettger.

With the backfield talent available, the Husker offense again could be impressive, once the spring rebuilding job jells in the fall. There is explosive potential, to say the least.

Defensively, only four starters return—right tackle Rob Stuckey (as in cookie), end Bill Weber, cornerback Dave Burke and safety Bret Clark. The Husker Black Shirts will have speed and quickness, perhaps better than in 1982, but they won't have quite the size and strength of past units.

Still, the defense looked solid in the spring and fall seasoning could bring it up to par with Nebraska's usual sturdy tradition.

There will be lettermen at all starting spots, Dave Ridder, Scott Strasburger, Eric Buchanan and Weber are all in the chase at defensive end. Mike Keeler and Doug Herrmann are veteran tackles, along with Stuckey, and lettermen Mike

CIMARRON '84 THIS ONE'S GOT THE TOUCH.

The Cadillac touch. It's everywhere. You can feel it when you put Cadillac's road-hugging Touring Suspension to the test. You can see it ...inside and out. From leather-faced front buckets with lumbar support to a hand-buffed exterior finish. It's attention to detail, too. Like push-button air. And aluminum alloy wheels. You've got to drive this car...and experience the Cadillac touch. Cimarron '84.

BEST OF ALL...IT'S A CADILLAC.

Let's Get It Together...Buckle Up.

About Tonight's Guests . . .

Tonight the University of Minnesota takes on the nation's best when hosting number one ranked Nebraska here in the Hubert H. Humphrey Metrodome.

It will be a severe challenge for the youthful Golden Gophers, and the invading Cornhuskers rank as heavy favorites.

Minnesota fans may remember, however, that the last time the Golden Gophers entertained a number-one ranked football team they upset mighty Michigan 16-0 (that was in 1977) to knock the Wolverines out of the top spot.

And while U of M fans may hope for a repeat performance in the home opener tonight, chances seem slim against the powerful Huskers.

Prior to the start of the '83 campaign, Nebraska Sports Information Director Don Bryant said, "Anyway you slice it, 1983 is going to be a long football season for the Nebraska Cornhuskers."

Bryant was alluding to the fact that Coach Tom Osborne gathered his flock on August 6 for the start of fall drills and the finale for Nebraska is scheduled November 26 against Oklahoma. On top of that, Bryant pointed out, Nebraska has "gone a-bowling" annually since 1969, and odds would indicate that the Huskers will be in action well into December and possibly January if they successfully defend the Big Eight championship they've won the past two years.

The reason for the early start was Penn State, a highly-touted team in its own right, an opponent Nebraska destroyed 44-6 on August 29 in the New Jersey Meadowlands.

Then last week Osborne brought his club home to Lincoln where it riddled Wyoming 56-20 to make it 2-0 for Nebraska coming into tonight's contest.

Despite the length of the season, there seems to be a bright side to Coach Osborne's situation, and therein lies the root of optimism that prevails in Lincoln.

"We'll have a good team, possibly a very good team," Osborne has said more than once during the summer. "We have a lot of fine players back and some very promising young players, but we won't know how good we can be until things get rolling in the fall. We do know we will miss a lot of players from the 1982 team who did an outstanding job for several years."

Last year Nebraska led the nation in most offensive categories, but particularly in rushing, total offense and scoring. A whale of a lot of the fire power returns, but a whopping number of the hole-openers must be replaced if the Huskers are to approach 1982 dimensions.

Osborne doesn't back off from bragging about his backfield talent, calling it the best material he's had during his 11 impressive years as Nebraska's head

Bob Devaney
Athletic Director

coach. Turner Gill returns at quarterback after racing away with All-Big Eight honors the past two years. I-back Mike Rozier shattered the Nebraska single-season rushing record last fall—in the first nine games, that is—enroute to consensus All-American recognition. His 1,689 yards ranked No. 4 in the nation and he's the top rusher returned among 1982 Heisman Trophy vote-getters. Irving Fryar, rated by many experts as the top receiver in the nation, returns at wingback, the spot where he's starred for the past two years.

Fullback Mark Schellen, a power runner with blazing speed, makes the No. 1 backfield appear formidable, indeed, and the depth picture is bright, too. Nate Mason, a two-year letterman, and Craig Sundberg, a one-year letterman who sparkled in the spring, will keep Gill hustling. Jeff Smith, who had a sensational sophomore season in 1982 when he posted a 10.2 average and gained 569 yards, makes I-back a solid position. A pair of talented sophomores, Paul Miles and Doug DuBose, could also enter the picture.

Shane Swanson and Jim Thompson both lettered at wingback in 1982, so Fryar can have capable relief, and letterman Tim Brungardt and soph Tom Rathman are solid fullback performers.

Up front, Osborne and Co., are rebuilding and the spring films show progress was made on replacing Randy Theiss, Mike Mandelko and Jeff Kwapick in the line. Steinkuhler, who led the grading in 1982, no longer is in the shadow of upperclass superstars, and senior Scott Raridon has lettered twice while playing very well as an alternate. That makes the right side solid, and the left side has lettermen John Sherlock at tackle and Harry Grimmering at guard, and the depth is

Tom Osborne
Head Football Coach

good with lettermen Mark Behning and Anthony Thomas still very much in the picture.

How about center? With Rimington gone—along with two Outland Trophies and the 1982 Lombardi Award—the hole looked big. But Osborne shifted alternate tackle Mark Traynowicz, who starred in relief against LSU in the Orange Bowl, to center and the hole doesn't look quite so big. Maybe that's because Traynowicz is 6-6 and 260 pounds with fine mobility and a heap of aggressiveness. Letterman Brad Muehling is also on hand.

Tight end remains a question mark, with only letterman Monte Engebretson boasting back-up experience. Three letterman line up at split end, Ricky Simmons, Scott Kimball and Scott Schoettger.

With the backfield talent available, the Husker offense again could be impressive, once the spring rebuilding job jells in the fall. There is explosive potential, to say the least.

Defensively, only four starters return—right tackle Rob Stuckey (as in cookie), end Bill Weber, cornerback Dave Burke and safety Bret Clark. The Husker Black Shirts will have speed and quickness, perhaps better than in 1982, but they won't have quite the size and strength of past units.

Still, the defense looked solid in the spring and fall seasoning could bring it up to par with Nebraska's usual sturdy tradition.

There will be lettermen at all starting spots, Dave Ridder, Scott Strasburger, Eric Buchanan and Weber are all in the chase at defensive end. Mike Keeler and Doug Herrmann are veteran tackles, along with Stuckey, and lettermen Mike

... The University of Nebraska

Tranmer and Ken Graeber lead the pack at middle guard.

There may be a few new faces at line-backer for the Huskers, but talent is not short. Mike Knox was devastating in the Orange Bowl and will take two letters into his junior year. Mark Daum also lettered as a sophomore in 1982 and had a good spring, but sophs will provide the reserves.

The secondary could be potent, but reserve depth must be developed in fall camp and early season to offset any injury problems that may develop. Neil Harris at left cornerback and Mike McCashland at monster, along with Burke and Clark, all have logged starting experience and playing time together.

Kicking may be the greenest area of the Husker game in 1983. Grant Campbell handled the punting the past two years, while Kevin Seibel did the place-kicking for the past four years, and both have departed. Newcomers Dan Wingard and Tom Demmeell appear to be the top punting candidates along with junior college transfer Scott Livingston, while Dave Schneider and Mark Hagerman will handle the kicking.

Like preceding years, Nebraska again expects to be in the race for the Big Eight title and the national championship. But there's still a lot of work to do before Osborne gets all the pieces fitted together.

Tom sums it up best when he muses,

"All I'm really sure of right now is that it definitely will be a long season!"

Minnesota and Nebraska have met on the gridiron a total of 47 times, and while the Golden Gophers hold an edge of 29-16-2 in the series, it has been the Cornhuskers who have held the upper hand of late . . . winning the last 10 consecutive contests.

— NU —

The University of Nebraska-Lincoln is one of the nation's most dynamic universities.

Rich in pioneering history and spirit, NU was chartered by the Nebraska Legislature in 1869. The University established the first graduate program west of the Mississippi River in the mid-1880s and was selected for membership in the prestigious Association of American Universities in 1909.

Over the years, alumni such as Willa Cather, Mari Sandoz and Roscoe Pound have enriched the University's tradition of leadership and scholarly excellence.

Today, more than 25,000 students from all parts of the world attend classes on NU's campus in Lincoln, Nebraska's All-American capital city.

The University is the intellectual center of the region. As Nebraska's comprehensive, land-grant university, NU serves a tripartite mission of teaching, research and service.

Come up to Sperry

shaping the future in semiconductor development

At Semiconductor Operations, the challenge as we see it, is to try and succeed where no one else has gone before. That's why the semiconductor professionals at Sperry are intent upon developing advanced highly reliable special purpose MOS, bipolar and hybrid devices. We have now moved into a new home and the labs and equipment housed in our 250,000 sq. ft. Semiconductor Operations

headquarters provide our engineering teams with the facilities for developing micro-electronic circuitry for use in the next generation of Sperry Computers.

We'd like to give you more information about the employment opportunities. Please contact Sperry Corporation, Computer Systems, Semiconductor Operations Employment, H2E25, P.O. Box 43525, St. Paul, MN 55164-0525. Sperry is an Equal Opportunity Employer. U.S. Citizenship Required.

At Defense Systems, our products are a sophisticated line of "ruggedized" high reliability

computers for use in airborne, land-based and shipboard applications. These high speed

leading the way in ruggedized computer technology

computers and related peripheral equipment are required to perform under extreme environmental conditions. They also employ the latest in gate array technologies. Helping us to get the job done are professionals with hardware and software backgrounds.

We pride ourselves on the high energy yet informal working environment here. And we invite your involvement in some of the most exciting projects our company has ever undertaken. Gopher Band At Full Strength

Your University of Minnesota Marching Band is at full strength for today's home opener against the Nebraska Cornhuskers. The 275-plus members of the Band returned to campus over a week ago in order to prepare for today's pregame and halftime shows.

You'll notice a new look in various sections of the Band this year, with the percussion section sporting a new set of flashy gold snare, tenor, and bass drums, befitting of the "Pride of Gold Country". In addition, the Minnesota Flags are outfitted with new uniforms, including fitted maroon pants and gold blouson top. Highlighted in maroon and white, the new uniforms are a colorful complement to the maroon, gold and white banners skillfully handled by this talented group.

The Marching Band has a busy schedule this fall, with performances at all Gopher home games. Highlights for the year will include Band Day on September 24, with 29 Minnesota High School Bands in attendance; a performance at the Vikings game on October 2; Homecoming on October 15 featuring the Minnesota Band, the University of Wisconsin Band, and the Minnesota Band Alumni; a trip to the Minnesota-Northwestern game in Evanston in late October; and of course, the annual Indoor Concerts at Northrop Auditorium on October 30 and November 6 and 13.

Pregame Show

Stepping off from the tunnel end of the field, the Band opens the 1983 football season with the Rouser Fanfare as Marching Band announcer Rod Person introduces the Minnesota Cheerleaders, Drum Major Jeff Thomas, and of course, Band mascot Goldy Gopher. The Band then proceeds downfield to the traditional strains of John Philip Sousa's "Minnesota March", written by the March King for the Minnesota Band in 1927, and still a favorite of Gopher fans everywhere. Next, we salute the visiting fans and team from the University of Nebraska, with the Cornhusker fight song. Now please rise and join in singing our National Anthem. The Band performs another Minnesota standard, "Go, Gopher Victory", as we prepare to wrap up our pregame festivities. Stand up and join in singing and clapping as the Band forms the Block M to the stirring sounds of the "Minnesota Rouser".

Halftime Highlights

The theme of today's halftime show is "On The Radio", presenting recent popular hits you've heard on the airwaves. The Band starts out with a tune from 1978, "Carry On" by the Brazilian jazz singer Flora Purim. Next, you'll recognize the title theme from "Flashdance", an O'Neill Sanford arrangement of this Irene Cara hit. Look for the rotating arcs, and "put your hands together" in time with the Band at the appropriate spots.

Moving on, Minnesota's Golden Girls are featured on Donna Summer's "She Works Hard For The Money". Choreographer/Dance Coordinator Paula Smuda and Captain/Business Coordinator Corrine Dahlman have put these talented dancers through their paces this summer, appearing at numerous parades and festivals to drum up enthusiasm for Gold Country. Promising more kick, more flash, and more dancing, the Minnesota danceline has never looked finer!

The show is rounded out with a lovely Lionel Ritchie ballad entitled "Truly".

Listen for the extreme dynamic contrasts from piano to fortissimo, the lush, warm melodies and rich harmonies, and the horn duet feature.

The Band now plays "Our Minnesota" and ends with today's halftime finale — please rise and join in singing our alma mater, "Hail, Minnesota", a Gopher tradition since 1904.

Indoor Concerts Ahead

On Sunday afternoons October 30, November 6 and 13, the University of Minnesota Marching Band will present its 22nd annual Indoor Concerts at Northrop Memorial Auditorium. These spirited events will feature all of the music performed on the field at pregame and halftime shows during the 1983 season. If you've never attended one of these exciting concerts, you are in for a treat. Because of the overwhelming success of these concerts we urge you to order your tickets early. Call the University Department of Concerts and Lectures (373-2345) or Dayton's for further details and ticket orders.

Who gives you investment ideas from the same source money managers look to the most?

Who else but Merrill Lynch.

People who know a business really well, soon learn who they can rely on for advice and information. In the investment business, it's the research team at Merrill Lynch.

For four years running, the Merrill Lynch research team has ranked first—by substantial margins—in the annual *Institutional Investor* poll of investment professionals.

But how does that help you if you're not investing millions at a time?

The key is your personal Merrill Lynch Account Executive. Our Account Executives have almost instant access to the full resources of Merrill Lynch research through a remarkable nationwide communications system. Current research opinions on some 1400 stocks are as close as their computer terminals.

And our Account Executives can call on specialists in such fields as tax investments and corporate and municipal bonds to amplify their own knowledge of any particular type of investment that might be appropriate for you. No other financial services firm gives its Account Executives such strong and diversified backup support.

And that's one reason no one else can give you more help with more kinds of investments. No one else.

Merrill Lynch

A breed apart.

**GUESS WHO HIRED
MORE PEOPLE RIGHT OUT
OF COLLEGE LAST YEAR
THAN ANYONE ELSE.**

Hiring college grads is something the Army has always done. And lately, we've been doing a lot more of it.

In fact, last year alone nearly 7,000 college grads chose to begin their future as Army officers.

Why? Some wanted the opportunity to develop valuable leadership and management skills early in their career.

Others were impressed with the amount of responsibility we give our officers starting out. And still more liked the idea of serving their country around the world.

Interested? Then you can start preparing for the job right now, with Army ROTC.

ROTC is a college program that trains you to become an Army officer. By helping you develop your leadership and management ability.

Enrolling can benefit your immediate future, too. Through scholarships and other financial aid.

So the next time you're thinking about job possibilities, think about the one more recent college graduates chose last year than any other.

For more information, contact the Army ROTC Professor of Military Science on your campus. Or write: Army ROTC, Dept. FB, P.O. Box 9000, Clifton, N.J. 07015.

**ARMY ROTC.
BE ALL YOU CAN BE.**

THE LEGENDARY BO McMILLIN

by Larry Vaught,
Danville Advocate-Messenger

College athletics have faced trying times in recent years and have been under intense scrutiny from both the media and sports fans. Many unpleasant incidents have made headlines in newspapers across the nation all too frequently.

That's why the life of Alvin Nugent "Bo" McMillin still stands out as a tribute to the good that can come out of college athletics.

McMillin and his teammates on the Centre College football team shocked the nation when they upset Harvard, a gridiron powerhouse that had not lost a game for five years, 6-0 on October 29, 1921. It was an astonishing victory for the school from Danville, Ky., which had fewer than 200 students, and stunned the sports establishment from coast to coast.

The elusive McMillin, who found his way to central Kentucky from Ft. Worth,

Texas, engineered the victory that many still consider to be the greatest college football upset of all times. He scored the game's only touchdown on a dazzling 32-yard run and changed the country's outlook about eastern football superiority.

"That was the first time big eastern schools ever paid any attention to teams from any place else in the country," says A.B. "Happy" Chandler, former governor of Kentucky and ex-commissioner of major league baseball. "Before then, the eastern schools were disdainful of anybody else. They didn't think they could be beaten. Bo McMillin changed that."

Centre, known as the "Praying Colonels" because of its pregame prayers, compiled a 38-4 mark during McMillin's career and no one disputes that the talented quarterback was the leader of the extraordinary group.

McMillin led Centre College to an amazing victory over Harvard in 1921.

continued

McMillin's contributions to college football, though, were not limited to his touchdown against Harvard.

In 1920 he and teammate Red Weaver became the first players from the South ever to make Walter Camp's prestigious All-America team. While there are many All-America teams today, Camp had the only genuine honor team in McMillin's day.

"It was rugged to get on that team," recalls George Chinn, the starting left tackle against Harvard in 1921. "Back then, having McMillin and Weaver make All-America was as big an upset as Centre beating Harvard. In those days you not only had to be north of the Mason-Dixon Line to be All-America, you had to be way

Association.

McMillin had a 14-year record of 63-48-11 at Indiana. He went on to coach Detroit and Philadelphia in the National Football League before his death on March 31, 1952. The legacy McMillin left behind, however, will never be forgotten. His journey from Texas to the small college in central Kentucky, which now plays Division III football, reads like a chapter in a fairy tale.

Norris Armstrong was captain of the 1921 Centre football team. Before his death in 1981 he talked about McMillin's childhood. Armstrong said, "He was raised in the stockyard district of Ft. Worth. That was one of the roughest, toughest places around then."

A Centre alumnus, Robert L. "Chief" Myers, befriended the troublesome youngster and had him join his high school gridiron team at Northside High. Myers later arranged for McMillin and four teammates to attend Centre.

Centre's entrance requirements were as high then as now and McMillin and Weaver, another Northside product, spent a year at Somerset, Ky., to acquire the needed academic credits. The duo, along with Texas high school teammate Thad McDonald, earned extra money by pressing clothes while flattening the opposition on the football field.

McMillin had his nickname "Bo" before he came to Centre. "Bo came from a railroad community and the only way to get around was to hop a train," explains Chinn. "He hoboed all over the place. Calling him Bo aptly described his method of everyday transportation. But it didn't describe his way of life. Bo was no bum."

"He was one of the most religious men I've ever known. He didn't swear, smoke or drink. If you uttered a profanity in the dressing room, Bo would be right there to knock your teeth out. He just wouldn't stand for it."

Off the football field, though, McMillin did have one well-known vice. His ability to manipulate the dice in a crap game is as legendary as his moves on the gridiron.

"When pay day came on the railroad, the railroaders just handled their checks before turning them over to Bo," recalls Chinn. "They made him put the dice in a cup and throw them against the wall. But he still won. It was the same with pool. He's one of the finest men I've ever known but he'd bet on how the wind was blowing or if the sun would come up."

To question his integrity, though, would be a mistake. Chandler points out, "Sure, Bo played craps and pool but he was a decent chap all of his life. He was a good man."

McMillin, who called himself "Nuge," was as innovative on the field as off. He

was one of the first college players able to pass while on the run. And in the open field his moves and intelligence left tacklers holding air because he was one of the first runners able to change directions after a play began.

Perhaps his greatest attribute was his leadership. The team named him captain three times. He set high standards for himself and expected the same from his teammates.

"Bo didn't just expect discipline and performance," explains Chinn. "He got it or else. But he was a great field commander, one of the coolest I've ever seen. He was all you could want in a quarterback wrapped up in one package."

"His only problems came because he had small hands. Bo didn't throw the most perfect pass you've ever seen. It would wobble but it always went just where Bo wanted it to."

McMillin actually played five years at Centre because most of one season (1918) was spent in Army training and did not count against his eligibility. The Colonels went 7-1, 4-0 and 9-0 McMillin's first three campaigns, and the unbeaten mark earned Centre a spot on Harvard's 1920 schedule. The eastern powerhouse won that first meeting 31-14, but as the final whistle sounded, McMillin vowed he would return and win in 1921. And he made good on his promise in such an impressive fashion that admiring fans from Boston carried him off the field after the stunning upset.

"It was a brilliant piece of football work," wrote one journalist after watching McMillin's TD run. "Bo used nearly every trick available to a runner. As a broken field runner, the Centre quarterback is probably without a peer in the country."

McMillin, unlike today's quarterbacks and other offensive players, also backed up the line on defense. He had the same flaming desire to succeed on defense.

Failure was a word McMillin never understood. He went from one success to another as a player, coach and person. He lived life to the fullest but never forgot his religion.

"Bo McMillin deserves to be a legend," says Chandler. "He was just a little Irish boy without parents who didn't seem to have a chance in life. But football gave him a chance to be a success. He never forgot that, and over the years he more than repaid his debt to the game that was so good to him."

Chinn adds, "Being able to survive the passage of time is the only testimonial Bo needs. He died young but he built a legend that should never be forgotten. Without Bo McMillin, college football wouldn't be what it is today."

As Indiana University's head coach, McMillin took the team to its first conference championship.

north."

McMillin's influence on the college game didn't stop when he ran out of playing eligibility after the 1921 season. As head coach at Centenary College in Shreveport, La., and Geneva College in Beaver Falls, Pa., he compiled records of 25-3 and 27-5-1. After moving on to Kansas State, he put together a mark of 27 wins, 21 losses and one tie.

His greatest success came at Indiana University, where he gave the school its only undefeated campaign and first conference championship in 1945. The former All-America was named Coach of the Year by the American Football Coaches Association and Football Man of the Year by the Football Writers

EAGLE GT

***If Shelby's name is on the car,
ours is on the tires.***

Carroll Shelby and Goodyear go a long way back. When Carroll built his first car — the now-legendary Cobra — it was on Goodyear performance tires.

Likewise for every Shelby Mustang GT-350 and GT-500.

And when Shelby helped Ford win LeMans and major international racing titles several times over, those world-beating cars were on our world-beating racing tires.

Now there's a new chapter in the Shelby saga. With the *new* Chrysler Corporation.

Times have changed. Cars have, too. But one thing's for certain.

Every Shelby Charger — and every Shelby-inspired car to follow — will wear two names: His.

And ours.

GOODYEAR
QUALITY AND INNOVATION

TOP DEFENSIVE PLAYERS IN THE COUNTRY

by Marvin West, Knoxville News Sentinel

College football is blessed with a bumper crop of defensive stars this season. Almost every school has a great linebacker or star tackle or brilliantly talented defensive back.

Georgia was once famous for a runaway tailback, a Heisman hero, star of track and football field. Alas, Herschel Walker is gone.

The next best Bulldog, and not all that bad, is rover Terry Hoage, America's defensive player of the year . . . if opponents insist on throwing the ball.

Hoage had 12 interceptions last season, tops in the country. He could have had

Georgia's Terry Hoage was a consensus All-America last year at rover.

more if teammate Jeff Sanchez hadn't been so quick. Sanchez intercepted nine, second best.

Hoage says he's been very lucky. Maybe that is correct. He could have missed the

Georgia experience. He grew up in Huntsville, Texas, the son of a college biology professor. Terry believed in the power of the Southwest Conference. He wanted to be a Texas Longhorn. He didn't get an invitation. A high school injury frightened away all the faint-hearted recruiters and only Georgia offered a scholarship.

Lucky? Hoage could have gathered splinters instead of gold stars. He was on the scout squad as a freshman. He had no natural position. At 6-3 and 196 and somewhat slower than the speed of sound, he could have developed into a full-time ob-

continued

server. But he wanted to play.

He decided to go to the Sugar Bowl that year. He looked for a way.

"I noticed the coaches liked extra effort in practice. They especially liked blocked kicks. I picked that as my course of action," recalls Terry.

He went crazy at kicking practice. Twice he jumped over the line and blocked placements. Vince Dooley noticed. The coach promoted Hoage to the varsity. Terry was invited along for the ride to New Orleans.

To Hoage's surprise, Dooley put him in the game against Notre Dame. Terry blocked a field-goal attempt. Georgia drove on to the national championship. Hoage became famous.

Coaches helped. Their defensive scheme has often had Hoage in position to make big plays. That's what a rover does . . . he goes to where the action is anticipated, transforming a soft spot into a pillar of strength.

In addition to 12 interceptions, Hoage had 101 tackles last season. Three times in a row he was Southeastern Conference back of the week!

Terry was a consensus All-America as a junior. He was also Academic All-America (3.85, majoring in genetics). Some say his good mind is a giant factor in his outstanding defensive stats.

Defending national champ Penn State expects to have a powerful defensive unit with an assortment of individual stand-

A defensive end-turned linebacker, Mississippi State's Billy Jackson, twice All-SEC, owns 41 career sacks.

outs. Safety Mark Robinson, safety Harry Hamilton, tackle Greg Gattuso and linebacker Scott Radevic all merit honors consideration.

Robinson, 5-11 and 197, plays free safety. He is already an All-America. He had two interceptions in the Sugar Bowl and four others last season. Among his other contributions was a 92-yard touchdown punt return against Rutgers.

"He's our best tackler since Jack Ham," says head coach Joe Paterno. "He reminds me very much of Jack Tatum, except Mark is quicker. Robinson could start for almost any team in the country at safety, cornerback, inside linebacker or running back."

continued

TOP DEFENSIVE PLAYERS

continued

Mark is an outstanding student (3.4 in finance). His older brother, Eric, is a professional footballer.

Michigan, also known for great defense, features linebacker Mike Boren, 6-3, 226, twice All-Big Ten. Boren made 151 tackles as a sophomore and 171 as a junior. Mike's story is improved by growing up in Columbus, Ohio and choosing to play at Ann Arbor.

Auburn anticipates having a powerful defense this season, especially up front. Pro scouts say tackle Doug Smith, 6-6 and 270, is the prize, but Auburn coaches hint that tackle Ben Thomas, 6-4, 265, might be better. He has a flair for big plays. Tackle Donnie Humphrey, 6-2, 275, was All-Southeastern Conference in 1981 but missed last season with an injury. He made 121 stops as a junior and was the finest down lineman in the league.

Pitt has some excellent defensive players. One of them, a starter since his freshman year, is Tom Flynn, who totaled 82 tackles and one interception as a junior free safety last season, and led Panther punt returners with 254 yards. The 6-0, 195 Flynn will make the move to offense in 1983 as Coach Foge Fazio tries him at quarterback. Another is Bill Maas, who became the first Pitt interior defensive lineman to gain All-America status since Randy Holloway in 1977. The 6-4, 260 senior defensive tackle garnered 59 tackles

Nicknamed "Killer," Michigan State's Carl Banks is a two-time All-Big Ten selection.

and 10 sacks and dropped runners for losses another seven times as a junior in 1982.

The Tigers are tough at middle guard, where Dowe Aughtman, 6-2, 269, holds court. Gregg Carr, a campus and team leader, is a good little linebacker. Junior cornerback David King has been an Auburn first teamer since the first game of his freshman year.

Best in America? Here are some good ones:

- Carl Banks, Michigan State end, 6-6, 235, twice all-conference, nicknamed "Killer."

- Rick Bryan, Oklahoma tackle, 6-4, 260, Big Eight defensive player of the year, quick enough to score 114 stops.

- Wilber Marshall, Florida linebacker, 6-1, 230, perhaps the best at what he does; 4.58 in the football 40, 33 inches in the vertical jump, finalist for the Lombardi Award.

- Don Rogers, UCLA safety, 6-1, 204, led team with 124 tackles last season, broke up 15 passes, intercepted four.

- William Fuller, North Carolina tackle, 6-4, 245, Outland Trophy finalist, twice All-Atlantic Coast Conference.

- Falaniko Noga, Hawaii middle guard, 6-1, 230, phenomenal athlete; runs 4.5, jumps 34 inches vertically, bench presses

450; twice All-WAC.

- Jay Brophy, Miami, Fla., linebacker, 6-3, 230, team MVP, 135 tackles, three interceptions, tore up Mississippi State last season with 18 tackles, a fumble and an interception.

- Russell Carter, Southern Methodist cornerback, 6-3, 185, led Southwest Conference with seven interceptions as a sophomore and got four more last fall, even though quarterbacks generally went the other way; blocked a punt against Arkansas that gave the Mustangs the league title; anchors a swift mile relay team.

- Johnny Jackson, New Mexico linebacker, 5-11, 210, Western Athletic Conference defensive player of the year, 21 tackles for minus yardage.

- Jack Del Rio, Southern Cal junior outside linebacker, 6-4, 235, All-Pac-10 as a sophomore, led Trojans with 17 hits for losses.

- Keith Browner, Southern Cal's other outside linebacker, 6-6, 220, an all-around athlete with four interceptions, three recovered fumbles and the speed to chase down sweeps.

- Leonard Coleman, Vanderbilt corner, 6-2, 208, eight interceptions for 101 return yards, wise, alert, aggressive.

- Chris Washington, Iowa State linebacker, 6-4, 219, best defender on a fine Big Eight defensive team, 147 tackles, brown belt in karate, better beware!

- Brock Spack, Purdue linebacker better known as "Spack Attack," 6-1, 221, made 131 tackles as sophomore, only 127 last season, chewed up Minnesota's ground game with 19 stops.

- Billy Jackson, Mississippi State end switched to middle linebacker, twice all-conference, 6-1, 225, owner of 41 career sacks.

- Andy Ponseigo, Navy linebacker, 6-2, 225, school-record 169 tackles last season, a tremendous team leader.

Navy also has an outstanding defensive back, Eric Wallace. Nebraska has a star safety in Bret Clark. UCLA is hoping corner Lupe Sanchez makes it all the way back from a fractured leg in the spring.

Texas coach Fred Akers says cornerback Mossy Cade has never had a bad game. Florida is equally proud of Tony Lilly, a senior safety who made 16 tackles in a 1982 victory over Southern Cal. Notre Dame looks to Stacey Toran for leadership in the secondary.

Colorado says Victor Scott is a special corner. Oklahoma State wouldn't debate. Scott returned two interceptions for touchdowns against the Cowboys.

Stanford speaks well of safety Vaughn Williams. Penn is proud of corner Tim Chambers. East Carolina safety Clint Harris turned five interceptions into 131 runback yards last season. Harris has been timed at 4.3.

Texas A&M thinks sophomore safety Domingo Bryant will grow up to be famous. North Carolina's Willie Harris already is. This strong safety was all-

All-America Bill Maas returns to anchor Pitt's defensive line.

continued

jured last season. Memphis State has been looking for help for Johnny Walker, outstanding as an outside linebacker but busier than coach Rex Dockery would like.

Other interior linemen worthy of all-star consideration are tackles Reggie White of Tennessee, Keith Millard of Washington State, Don Thorp of Illinois, Chris Scott of Purdue, Freddie Gilbert of Georgia, Andre Townsend of Ole Miss, sophomore T.J. Turner of Houston, Alphonso Carreker of Florida State and Steve Hamilton of East Carolina.

Other outstanding middle guards include Olympic-type shot-putter Michael Carter of SMU, John Daniel of Brown, John Zaneski of Yale and Brian Pillman of Miami of Ohio.

Other linebackers to look for this fall include Oklahoma's Jackie Shipp, good for 21 tackles against Texas in 1982. Shipp was unanimous All-Big Eight. He led the Sooners with 142 stops.

Notre Dame features Mike Larkin, only 6-1 and 209 but very quick. California linebacker Ron Rivera has twice led the team in tackles. Linebacker J.D. Fuller has twice been second at South Carolina. Fuller is the cousin of more famous Calvin Hill.

Last year Ricky Hunley, a 6-2, 230-pound senior from Petersburg, VA, became the first consensus All-America selection in Arizona history. The two-time All-Pac-10 performer (1981-82) has made 390 tackles in his three seasons at inside linebacker.

Tulsa's top linebacker is Cliff Abott, an all-conference hitter. Georgia looks to Tommy Thurson. Minnesota is paced by Peter Najarian. His dad does heart transplants except on Saturdays.

Utah follows the pace of Mark Bloesch. Ron Faurot is big at Arkansas. Kentucky has a hitter in John Grimsley. North Carolina State's Vaughan Johnson made 167 tackles last season. Andy Hendel had 161 stops for the Wolfpack.

Wyoming says sophomore Jay Haynes will be a great one. Virginia sophomore Charles McDaniel made 109 hits as a rookie. John Offerdahl, sophomore at Western Michigan, played 10 games as a freshman and led the team with 149 tackles.

Almost everybody has a linebacker. Colorado State's Jeff Harper is in his school's record book with 160 hits last season. He had an unbelievable 32 tackles against Wyoming. From such numbers are legends made.

Seagram's 

ONE PLAYER'S VIEW OF GAME DAY

by Tom Luicci, Newark Star-Ledger

The game itself has evolved into a sophisticated maze of offensive formations and defensive alignments. From the coaches—who are now “coordinators” and who issue detailed tomes called playbooks—to the training techniques and practice sessions, advanced technology has taken over.

Even the setting for the games has shifted dramatically, from small, creaky stadiums to massive concrete facilities that now often seat upwards of 80,000 people.

One thing, however, will never change in college football. It has always been, and will

probably always be, a game of emotion. The reason is the players.

“There’s something special about game day that you can’t appreciate unless you’ve been through it,” said one of this year’s top running backs. “It’s everything about the day. The pre-game meal, getting taped and dressed and then going out on the field. You have to go through it to understand what goes on and how the whole day builds.”

For as long as the game has been played, no one has yet discovered a right way or a wrong way to approach a game on Saturday

continued

GAME DAY

continued

"Even now I'm pretty relaxed, but some guys are really psyched up. There's a lot of dead time and you see a lot of strange things. A lot of players are superstitious."

afternoon. There is no right way or wrong way, but there are plenty of different ways. And, in the end, it comes down to controlling that excitement and channelling the building emotion.

Often, that is not as easy as it sounds. How many coaches have lamented after a loss that their teams were "too psyched up" and too emotionally high?

All the technology in the world has still been unable to come up with a way to bring players to just the perfect emotional peak.

Here is one player's view of game day:

EARLY MORNING (sometime between 9 and 10:30 a.m.): For home games, we eat our pre-game meal at a dining hall on campus. I enjoy home games a lot more, for obvious reasons. I'm with family and friends and everything is familiar. On the road, we'll usually eat a little earlier at a hotel because we're usually further away from the stadium. On the road we start breakfast around nine o'clock. At home, it's usually an hour later.

Most of the guys are quiet during breakfast. We eat a good meal. Steak, usually. Some of the guys have problems eating in the morning because they're starting to get worked up. I'm usually pretty relaxed, so I don't have any problems eating. You see some guys with trays of food and trays of orange juice and milk. I eat my normal breakfast.

Most of the older players are relaxed. They've been through this before. They talk about almost anything. But most of the time, no one is talking about the game. Sometimes, coaches will come by to check to see how a player is, if he's getting over an injury or hasn't been feeling well.

Pre-game meal is usually pretty quiet. It's a lot like everywhere else—everyone is just getting up.

LATE MORNING (between 10:30 and 12): The bus ride over to the stadium is usually pretty quiet, too. A lot of the guys are wrapped up in their own little worlds,

trying to get mentally ready. Once we leave breakfast, we're on our own. Everyone wants to get into the locker room and get started on what he has to do. I start getting a little anxious.

There are a lot of things to do now, but a lot of the guys are pacing around the locker room, trying to burn off energy. Some guys have to go in and get taped right away. I like to get that over with. But a lot of guys are just sitting in front of their lockers. There's usually a television on somewhere. I like to watch cartoons after I get taped because it helps me relax. It keeps my mind off things for a little while.

A lot of players read the game program. Honest. I don't know how many of them actually read through it, because some of them just flip through the pages. It's a

way to keep calm. I read through it. It starts getting me ready and starts me thinking about the game.

I also like to make sure my name is spelled right.

Around 11:00 or a little after, we have meetings. Everyone breaks up into groups and the coaches go over things again just to make sure we all know what we're supposed to do and to make sure there are no last-minute questions. The meetings aren't too long. After that, everyone starts getting dressed. That's when the adrenaline starts flowing.

We don't do it, but some teams go out onto the field before they get dressed and just walk around the field to get the feel of it. Sometimes it helps if you haven't played in a place before.

continued

A state-of-the-art racecar. A state-of-the-art motor oil.

The powerful Pennzoil-Penske Indy car is a marvel of advanced automotive design. Over 10,000 parts go into it—600 into the engine alone. All state-of-the-art. All built for reliability.

It takes the skill of Rick Mears, Indy car champ, to handle it. And when his engine's turning over 10,000 RPMs... he needs a motor oil engineered for reliability. Pennzoil... for tough engine protection.

Pennzoil makes motor oil for all kinds of cars. As car engines have become more complex, Pennzoil has kept up-to-date with their new demanding requirements. So you get the "today" protection your car needs.

Pennzoil quality means protection you can rely on.

Protection you can rely on.

GAME DAY

continued

Even now, I'm pretty relaxed, but some guys are really psyched up. There's a lot of dead time and you see a lot of strange things. A lot of players are superstitious. They have special routines for getting dressed. But everyone takes his time getting dressed. I don't consider myself superstitious, but I do certain things the same way. Habit, I guess. I always have to have the name on my socks on the outside. And I always put the pads on my left side in first.

After I put my pads on, I'll walk around, just to make sure everything's right. Some guys walk around after every little piece they put on. By now, you can start to see more guys getting excited.

Some guys walk around to the different lockers and try to get other players going. They'll pound you on the shoulders and ask you if you're ready. Some of what goes on is like what you see in football movies. Guys are banging their heads against

"I'm just trying to concentrate on what I'm supposed to do and what my assignments will be, but it's tough not to get caught up in the excitement."

later, the rest of the team goes out. Most of the crowd is usually in the stadium, so the team really starts to get pumped up.

The calisthenics and drills get us going more and more. Now everyone is yelling. Even me. The coaches come around and double check with us. I start getting butterflies. I just want to get started. It's important, though, to make sure you're loose, especially on cold days. We break

lockers, things like that. One time we had a defensive lineman who taped the number of the other team's quarterback on the wall and kept banging his head against it while he screamed. He had his helmet on. That was just the way he got psyched up. There is a lot of electricity now, a lot of guys screaming and yelling and pacing.

By now, everyone's thinking about the game and totally consumed by it.

I'm not a yeller, but I can see where it helps some guys. But I do like to be left alone.

EARLY AFTERNOON (between 12:15 and 1:15): I feel like I'm ready to play. Around 12:45 or so (for a 1:30 game) the special teams go out to get loose. A little

up into groups again and make sure we all know what we're supposed to do.

It's almost impossible to find someone in the stands, even if you know exactly where they're sitting. But everything is starting to peak now. The band is playing and the people are cheering. When we break and go back into the locker room, everyone is going crazy, jumping all over each other. It's wild, but we all know what we're doing. I'm just trying to concentrate on what I'm supposed to do and what my assignments will be, but it's tough not to get caught up in the excitement.

It's usually pretty loud when we go back into the locker room.

I can't describe what it's like when we go back out onto the field for the starting

lineups. It's a big emotional rush, because the whole stadium is going crazy. I've learned to control myself because it's easy to get carried away by it. You can get too psyched up and forget everything you're supposed to do.

GAME TIME: On the sidelines, everyone is moving back and forth. Everyone is nervous, pacing around, wishing the game would start. You have to keep your head. Some guys can't watch the opening kickoff, but almost everyone is standing on the sidelines. If we're kicking off, we're just hoping the other team doesn't run it back. If we're receiving, we just hope for good field position.

Guys will be walking around, patting each other, trying to be encouraging. But that's just another way of burning off energy. I really have a lot of butterflies now. People will talk to me, but I really don't hear what they're saying, so I just nod yes. I'm too wrapped up in what I'm supposed to do.

The game is the easiest part. Everything falls into place. We all know what we're supposed to do and we just have to make sure we do it. On offense, if we're stopped, a couple of us will get together on the sidelines and talk things over. Sometimes the coaches will come over to get a feel for how we are or to explain something. I get the feeling a lot of them would like to be out on the field.

Sometimes, during the week, I might daydream a little about making a big play or maybe scoring a touchdown. When I actually do it, it's probably the greatest emotional high I'll ever experience.

By the time the game develops, a lot of the emotion gives way to concentration. I'm very business-like after a while. All the buildup is over and I'm just trying to keep a level head. That's hard to do if you come up with a big play.

There is not as much emotion during the game as there is before it or at half-time. Mostly, everyone is concentrating on his assignments. But if someone does make a big play, everyone gets going again. All day, emotions are up and down. You've got to learn to control them. I've seen a lot of guys who were just too emotional and too anxious. That does more harm than good.

Halftime can be like starting all over again emotionally. I review things, make certain adjustments and try to think about what I did in the first half—both good and bad.

Depending on how close the game is, things can really get tense on the sidelines in the second half.

POST-GAME: Now comes the hard part—meeting with the media. Do they have to ask the same questions over and over again?

SCHOOL SONGS

by Cathy Breitenbucher,
Milwaukee Sentinel

They're played at commencements and weddings and, yes, at college football games.

College fight songs have earned their spot in American musical history. Some are as recognizable as the jingles Madison Avenue spends millions developing and piping into our homes. But these songs sell school pride, not laundry soap.

The enthusiasm of an autumn Saturday afternoon is built around memorable words like "Boola, boola" and "Rah, rah, rah for Ski-U-Ma." And while some marching bands use two or more school songs, the official, original fight songs live on.

One of the oldest and most famous is Michigan's "The Victors," a turn-of-the-century song inspired by the Wolverines' upset win over an Amos Alonzo Stagg-coached University of Chicago squad. It was written by Louis Elbel, then a soph-

SCHOOL SONGS

continued

omore on the Ann Arbor campus. Elbel, who had studied in Leipzig, Germany to be a concert pianist, later opened a music house in South Bend, Indiana, where another famous college song is heard.

Elbel and William Revelli, director of the Michigan band from 1935-71, were long-time friends until Elbel's death about 20 years ago.

"He had a great sense of humor and he enjoyed coming back to the campus to direct 'The Victors,'" said Revelli. "One time, I wanted to change some things in the song, put down the brass in that soft trio. But he wanted it louder and louder. We rehearsed it that way, but when we got to the performance I had told the band to really play it loud, and the trombones even stood up. He got quite a laugh out of that."

That other South Bend tune, Notre Dame's "Victory March," was written in 1908 by brothers John and Michael Shea. Both were students there at the time, and Michael went on to become a priest.

"I knew John, and he said that many of the schools in that period had started to have their own songs and Notre Dame didn't have one, so he and his brother just wrote it," explained Robert O'Brien, director of the Notre Dame band.

The "Victory March" is widely copied by high schools, particularly Catholic schools, across the country. In fact, O'Brien was director of two high school bands in the 1940s that had adopted the song as their own. "I never dreamed I would be here directing the Notre Dame band," he added.

Joseph Casasanta wrote several songs for Notre Dame when he was band director in the '20s and '30s. Among them was "Notre Dame Our Mother," the alma mater. It was first played at Knute Rockne's funeral in 1931.

Oklahoma's "Boomer Sooner" was borrowed from the classic Yale "Boola Boola." The Oklahoma band uses two other songs, "OK Oklahoma," written by Fred Waring, and "Oklahoma!" from the Broadway musical and film. The latter also is the official state song.

"Boomer Sooner" is one of those songs that everyone kind of laughs at when they hear it, but it makes people's blood run red around here," said Gene Thraillkill, director of the OU band the last 12 years. "When I first took the job here and they sent me a recording of 'Boomer Sooner,' I thought, 'they've got to be kidding.'"

The Iowa people weren't kidding when they replaced the "Iowa Corn Song" with

a Meredith Willson-written fight song in the 1950s. Willson, a native Iowan who gained worldwide fame with "The Music Man," knew plenty about band music. He had been a flutist with John Philip Sousa's band that toured the U.S., Mexico and Cuba from 1921-23.

It might seem as if Wisconsin has replaced its classic "On Wisconsin" with "You've Said It All," a rousing singalong song that was originally heard only in beer commercials. But Michael Leckrone, director of the Badger band, insists that "On Wisconsin"—another school song which also is the official state song—is still No. 1.

"On Wisconsin" became the school song after a university-sponsored contest in 1906, first prize \$25. Carl Beck and William Purdy originally had written it as a Minnesota fight song—Purdy, legend has it, had never even been in Wisconsin—but they changed the lyrics when they heard about the search for a Wisconsin song. Now, "On Wisconsin" is played by high school bands across the country.

"When we go on a road trip, we always play at a high school football game too, and often 'On Wisconsin' will turn out to be the fight song for both of the high schools," Leckrone said.

The University of Southern California is one of the oldest universities in that state, and it has one of the country's oldest and most famous songs. "Fight On" was written in the 1920s by Milo Sweet, then a student. He became an orthodontist and, sadly, died on New Year's Eve, 1979—the day before USC's last Rose Bowl appearance.

Tony Fox, assistant director and arranger of the USC band for the last 13 years, rates "Fight On" among the top fight songs in the country.

"It's something that's highly identifiable with the university and the band. When

SCHOOL SONGS

continued

you have a really famous fight song, people who aren't even alumni of the university get going when they hear it," said Fox. "They hear that fight song and it's really a battle cry."

USC often uses another song, "Conquest," from the 1947 film "Captain from Castille." Though the film concerned Cortez' march through Mexico, the song fits in nicely with Trojan marches as well.

But can football fans get too much of a good thing?

Band directors generally follow their instincts when it comes to determining how often a school song should be played. Some things they can't control, though. By tradition, for example, the OU band plays "Boomer Sooner" after touchdowns and "OK Oklahoma" after extra points. There has yet to be documentation of a coach holding down the score to prevent the band from playing the school song.

"My rule of thumb is to try not to overplay it," Leckrone said of "On Wisconsin." "I try to use it judiciously so that when it is played, it has some impact."

Impact? When 70,000 or so people sing and clap their hands over a school song, that's more than impact. It's musical magic, and it happens coast to coast every fall.

School songs have stirred college football fans since the turn of the century.

NEW NCAA RULES FOR 1983

Following is a summary of the major rule changes adopted by the NCAA rules committee at its January 1983 meeting:

The Kicking Game—The rules committee adopted three major changes in the rules governing the kicking game.

1.) Officials were given direction for determining what giving a player an "unmolested opportunity" to catch a punt or free kick entails. The committee defined "unmolested opportunity" as meaning all players of the kicking team must remain two yards in all directions from the receiver while the ball is in its downward flight.

2.) The committee deleted the exception to the roughing the kicker penalty provided to players blocked into the kicker, and substituted the following provision: A kicker or holder guilty of faking being roughed or run into will be penalized 15 yards for unsportsmanlike conduct.

3.) The penalty for roughing the kicker or holder remained unchanged at 15 yards and automatic first down, but the penalty for running into the kicker or holder was established at five yards.

Officials—The committee amended the rules to allow

for the use of a seventh (the previous limit was six) official, a side judge, to aid enforcement of rules regarding illegal use of hands.

Disruption and Delay of Game—The committee passed three rule changes designed to stop what it called "disruptions on the field that delay the game or engenders ill will after scores or any other time."

1.) The penalty for a substitute entering the field for any purpose other than to replace another player was increased from a five-yard delay of game penalty to a 15-yard unsportsmanlike conduct infraction.

2.) Cheerleaders, band members and mascots were added to the list of those subject to the rules and official decisions.

3.) The rule requiring the player in possession to return the ball immediately to an official after a score or any other play was amended to prohibit taking the ball off the field, kicking or throwing the ball any distance that requires an official to retrieve the ball, spiking the ball, throwing the ball high into the air and any other unsportsmanlike act that delays the game.

*Some folks settle for the end zone.
I'll take the 50-yard line every time. Which is not to say
I'm always a spectator. I mean like right now
I could tackle the surf, catch some rays, run down the beach.
You name it!
(Time-out! Let's hit the beach!) You've got a point.*

THE I-FORMATION

continued

an explosive Wishbone halfback.

Now for the next interesting angle. Even Oklahoma began the switch away from the 'bone to the I last season, meaning we not only have a trend here, but a stampede to this versatile offensive attack.

Most close followers of college football are aware that Southern California was the first to exploit the advantages of the

to the defense.

As with many football formations over the years, one person climbs to fame and gets most of the credit for somebody else's idea.

At Delaware, for example, when Dave Nelson was the head coach he devised the Wing-T to combine the quick-striking power of the T-formation with single-wing blocking.

other coaches saw nothing special in what he was doing.

Critics said the I didn't allow for much versatility—amusing now, since that's one of its main features—and questioned whether ballcarriers could get outside the ends when packed so close to the line of scrimmage.

This was the crucial change made by McKay. He moved the tailback six or

Among the Heisman Trophy winners to run out of the I-formation are Longhorn Earl Campbell (left) and two-time winner Archie Griffin of Ohio State.

I-formation back when John McKay was head coach from 1960 to 1975.

USC has produced Heisman Trophy recipients with steady regularity, plus several others who wound up No. 2.

First there was Mike Garrett in 1965 and O.J. Simpson in 1968, both of whom were judged to be best in the land. They were followed by Anthony Davis in 1974 and Ricky Bell in 1976, both of whom finished second in the Heisman voting.

More recent Trojans who ran off with the Heisman were Charles White in 1979 and Marcus Allen in 1981. All six of those players, of course, piled up their yardage as I-backs behind a wave of blockers, giving rise to the term: "Student Body Right, Student Body Left." That's how it looked

But it was Nelson's old friend and former Michigan teammate, Forest Evashevski, who brought the Wing-T to national prominence when he took Iowa to a pair of Rose Bowl victories in 1957 and '59.

So it was with McKay. He did not originate the I, he merely copied and altered the idea Tom Nugent developed at Florida State in the 1950s.

Nugent is believed to be the first coach to have his team line up with the quarterback under center, the fullback close behind and the tailback right on their heels in a tightly-bunched trio. It was an I as opposed to a T.

Nugent enjoyed modest success, both at Florida State and later at Maryland, but

seven yards behind the line, giving him the latitude to follow his blockers outside for good gains, or to cut back inside and utilize his natural instincts as the play develops.

What you had was the concept of the old single-wing tailback—which is the position McKay had played as a high school star in West Virginia. Later, he was a T-formation halfback at Purdue just after World War II, before he transferred to Oregon.

Having played both styles, he had this to say in a book called "McKay, a Coach's Story":

"A single-wing tailback has the ideal running posture. He's in the middle of the

continued

HORMEL CHILI. ALL THE MAKIN'S OF HOMEMADE.

Good lean Hormel beef. Rich tomato sauce. Plump chili beans.
And a secret blend of spices to make it taste just like home.
Hearty and delicious. Serve it. And don't be surprised if they ask,
"Is it homemade or Hormel?"
Because sometimes it's really hard to tell.

THE I-FORMATION

continued

formation, directly behind the center, and back far enough to get the best running angles.

"But more important, he can see what's going on—because he's almost upright. He's not scrunched over in a three-point stance; his hands are on his knees. He has to be that way in order to do all the things required of a single-wing tailback.

"The T-formation was great, but as a T-formation halfback, the view I got was mostly somebody's rear end."

Thus, in effect, McKay made his best runner into a single-wing tailback, a workhorse who would carry the ball 25 times a game and more.

Garrett's figures reflect the change—each for a 10-game season: 125 carries for 833 yards as a sophomore I-back in 1963, then 217 for 948 yards the next year, and 267 for 1,440 yards when he won the Heisman.

Simpson came along to roll up 1,709 yards in his Heisman year, an NCAA record since bettered (by Marcus Allen, 2,342 when he won the Heisman), and O.J. lugged the ball as many as 20 times in a quarter!

What USC accomplished in those years under McKay—he had a 127-40-8 record—naturally wasn't lost on the rest of the country.

As more teams began to give the I a try with their talented running backs, tailbacks like John Cappelletti of Penn State captured the Heisman in 1973, Archie Griffin of Ohio State became the only two-time winner in 1974-75, and Tony Dorsett took home the prestigious award while leading Pittsburgh to a national championship in 1976.

Veteran Ohio State Coach Woody Hayes had almost lived and died with a fullback-oriented offense for years, until Griffin demonstrated how much easier it was to reel off long-gainers by improvising as an I-back.

Woody was a reluctant witness to what he was seeing, however. He didn't believe a back could be so effective without going "by the book."

Hayes ordered his statisticians to keep charts on every play that was called and where it went. The evidence conclusively showed Griffin making more long runs doing his own thing, going for daylight and not necessarily where the original play was directed.

Woody still got plenty of mileage from his fullback, though, because he had a 240-pound tank named Pete Johnson helping to clear the way for Griffin. The year Archie won his second Heisman, Johnson led the nation in scoring with 25 touchdowns.

The split-back Veer and Wishbone offenses have been the other leading

methods of moving the football on the ground over the last two decades, but defenses have made rapid inroads on undermining their effectiveness.

At Texas in 1977, when Earl Campbell was thundering toward the Heisman, the unbeaten Longhorns were going nowhere one afternoon against Baylor. They were trailing, 7-0, when Campbell dropped into the I-back slot, gathered in a pitchout and romped 68 yards to a touchdown. It was the spark that ignited a 29-7 victory.

"We thought we were going to be fired," recalled one of Fairbanks' assistants at the time. "We'd already lost a conference game to Kansas State, and if we also lost to Iowa State, we figured that would be it.

"About our only hope was the Wishbone. We decided to go with that and let the chips fall where they may. The rest is history."

There's a bit more to the story than that, however. Iowa State jumped out to a 21-0 lead in the first quarter, and you can imagine how those insecure coaches felt

Even former proponents of the Wishbone have been turning to the I in recent years.

Texas and Oklahoma were two of the foremost Wishbone exponents, but the glory days for that triple-option attack faded after Sims powered the Sooners to a 22-2 record by rushing for 3,268 yards in 1978-79.

Oddly, the Oklahoma Wishbone was both born and killed on a playing field far from Norman. The epitaph might read: Born 1970, died 1982, Ames, Iowa.

Things were not going at all well for Coach Chuck Fairbanks and his Sooners early in the '70 campaign. Steve Owens had won the Heisman (yes, as an I-back) for Oklahoma the previous year, and Fairbanks then shifted to the Veer offense, hoping to take advantage of quarterback Jack Mildren's ability.

But losses to Oregon State, Texas and Kansas State left the Sooners no better than 3-3 heading for Iowa State.

The Wishbone had been tried briefly but failed to generate much offense in the 41-9 thrashing by Texas. Things were desperate.

by then.

But the Sooners rallied to win a 29-28 thriller, and the rest is pretty much history. They lost very few times with the Wishbone over the next decade.

There is one basic problem with the Wishbone, despite all the trickery and explosive potential. The defense can almost dictate which back will carry the ball by the way it deploys, whereas in the I-formation it's the offense that sets the tone by repeatedly giving the tailback room to roam.

Dropback passers also are an integral part of the I. Wishbone quarterbacks must be runners first and foremost. There is little flexibility.

It's worth noting that all the major bowl games last New Year's Day were won by teams running primarily from the I-formation: SMU in the Cotton, UCLA in the Rose, Nebraska in the Orange and national champion Penn State in the Sugar.

Obviously in college football these days, the I's have it.

IT WAS A GREAT GAME, BUT IT'S GOOD TO BE HOME.

Right now you are wishing you didn't eat so many hot dogs and drink that last can of beer. But you're home now.

And right there, between the cotton balls and the bandages, you find your Alka-Seltzer®.

As you listen to the familiar fizz of those

relief-laden tablets, you smile through your discomfort.

You know that for upset stomach with headache, *nothing works better, nothing is more soothing than Alka-Seltzer.*

No wonder it's America's Home Remedy.

ALKA-SELTZER®. AMERICA'S HOME REMEDY.

Meet the 1983 Gopher Coaches

Joe Salem is in his fifth season as head football coach at the University of Minnesota in 1983, and a thorough appraisal of the situation shows that his many fans in Gold Country are happy Smokey Joe decided to come home.

No stranger to Gold Country, Salem played quarterback and earned varsity football letters at Minnesota under Murray Warmath during the 1958, 1959 and 1960 seasons. He was on the Gopher football team that faced Washington in the 1961 Rose Bowl, and he was a member of the U of M team that gained a national championship in 1960.

When the 45-year old Salem was selected to take over the coaching reins at Minnesota in December, 1978, Athletic Director Paul Giel said, "We are delighted to recommend Joe to President Magrath and the Board of Regents as our new coach. He impressed us from the very beginning with his knowledge of the game of football. He has proven to be a winner wherever he has coached, and it is obvious that he is his own man."

Apparently Salem was just as pleased to be named the coach and to be "coming home" to Minnesota. "I know the job presents a real challenge," Smokey Joe admitted on the day of his hiring, "but returning to my alma mater is something I have thought about for a long time. Everyone knows that the University of Minnesota is an outstanding institution with a great football tradition, and I'm very pleased to be a part of those things once again."

Originally signed to a three-year contract at Minnesota, Salem was rewarded with a three-year extension on that pact following his 1981 campaign as an ex-

pression of appreciation from the U of M administration for a job well done.

Following his playing days in Gold Country, Salem stayed on at the University of Minnesota as a member of Warmath's coaching staff through the 1965 campaign.

In 1966, Salem accepted the head coaching post at the University of South Dakota, and he remained there for nine years. Four of his teams were ranked in the nation's top 15 among NCAA Division II schools. He won 29 of his last 37 games at USD . . . a vast improvement for a program that had tasted victory only nine times in six years prior to his arrival on the scene.

Salem's South Dakota teams tied for the North Central Conference Championship in 1972, '73 and '74, and he reaped District 6 Coach of the Year honors in 1972. He also vaulted into second place on South Dakota's all-time coaching list with an overall record of 52-38-2 there.

Then Salem headed for Northern Arizona University where he coached for four seasons. He compiled a 26-17 record at Flagstaff with a 1-9 mark in 1975, 8-3 in '76, 9-3 in '77 and 8-2 in '78 when also going 6-0 in the Big Sky Conference enroute to the championship.

He was selected as the Big Sky Conference Coach of the Year in 1977 and 1978, and he was the District 8 Coach of the Year in 1977.

After 17 years as head coach at the collegiate level, Salem's record stands at 96 wins against 80 losses and 3 ties.

Salem and his wife, Sue, have four sons. . . . Tim 21, Wade 19 and 13-year-old twins Brad and Brent.

Lawrence Cooley
Assistant Football
Coach

Lawrence Cooley started his tour of duty with the University of Minnesota coaching staff as a part time assistant during the spring of 1983 and was elevated to a full time coaching post, assigned the task of working with the offensive line in August.

Now 29, Cooley hails from Michigan and was graduated from Monroe High School there in 1973 after gaining All-Metro honors in the Detroit area and then being named to the Michigan prep All-State team as a senior.

Following his graduation from Monroe, Cooley enrolled at the University of Nebraska where he became a three-year letterman and a starter as an offensive guard for the Cornhuskers.

Cooley stayed on with the Cornhuskers as a graduate assistant for two seasons and received his B.S. degree from the University of Nebraska in 1980.

Then Cooley joined the Tom Osborne staff as a part time assistant and worked in that capacity through the 1982 campaign before becoming a part of the Joe Salem scene at Minnesota.

Married, Cooley and his wife Laurie have one daughter, Ashley Rae.

Chuck Dickerson
Assistant Football
Coach

Chuck Dickerson became a part of the University of Minnesota football scene in 1983 when he was named defensive coordinator by Head Coach Joe Salem. His special area of concentration is with the linebackers.

A product of Roxana, IL, High School, the 45-year old Dickerson gained fame as an All-State football selection and a prep All-American there before being graduated in 1954.

After graduation, Dickerson enrolled at the University of Florida and played there for two years before entering the U.S. Marine Corps. Following three years in the military, Dickerson entered the University of Illinois and became an All-Big Ten selection at tackle.

Dickerson then spent eight years in professional football first as a player and then as a coach with the Boston Patriots, Buffalo Bills, Montreal Alouettes and Toronto Argonauts.

In addition, Dickerson also boasts five years of coaching experience at the high school level in Illinois.

Married, Dickerson and his wife, Shirley, have one son who currently is in his second year at the United States Naval Academy in Annapolis, MD.

Dennis Dixon
Assistant Football
Coach

Dennis Dixon was named to the University of Minnesota football coaching staff in 1983 by Joe Salem and assigned the task of serving as the Golden Gophers' offensive line coach.

Dixon hails from California and had an outstanding prep career before going on to Fullerton Junior College where he gained All-America honors, was his conference's Most Valuable player and his team's captain during a season when he led his mates to the Junior College National Championship.

From there Dixon went on to the University of Alabama where he immediately took over as a starting tight end and played with the Crimson Tide in both the Cotton and Rose Bowls before being graduated in 1969.

For the next three seasons, Dixon served as a graduate assistant at Alabama where he worked with the tight ends and with the interior offensive line. In 1971 Dixon moved on to Troy High School in Fullerton, CA.

Also deeply involved in the Golden West strength training program, Dixon established himself in California as a top-notch recruiter. He is 36 years old, married and has two sons.

Salted in the Shell

Clarence Hudson
Assistant Football
Coach

Gerald O'Dell
Assistant Football
Coach

Bob Rankin
Assistant Football
Coach

Clarence Hudson was beckoned to the University of Minnesota by Head Football Coach Joe Salem in 1983 and given the assignment of working with the U of M's receivers and quarterbacks while functioning as the offensive coordinator.

A 1968 graduate of Madill, OK, High School, Hudson was an All-State prep selection and served as his team captain. He also was named to his school's National Honor Society and then went on to Southeastern Oklahoma State University.

At Southeastern, Hudson gained all-conference honors, was a member of the Tau Kappa Epsilon Fraternity and the President's Club before receiving his B.S. degree in 1972 and his M.S. degree in 1974.

Hudson's coaching career got underway at Atoka, OK, High School and continued for two more years at Altus, OK, High School as well as at Tascosa High School in Amarillo, TX, during the 1975-76 campaigns.

Then Hudson moved on to Wichita State University for two years where he worked with the wide receivers and flankers before joining the Iowa State University staff in 1979.

Gerald O'Dell came to the University of Minnesota as a member of the Golden Gopher football coaching staff in 1983 and immediately was assigned the duties of tutoring Minnesota's linebackers.

O'Dell is a native of Wichita Falls, TX, and gained all-conference honors in high school there before being graduated in 1967. From Wichita Falls, O'Dell went on to Southeastern Oklahoma State University where he was named captain of his grid team for two years before being graduated in 1971.

From Southeastern State, O'Dell moved on to the University of Oklahoma where he filled the post of graduate assistant during the 1972 season. He then functioned as an assistant coach at Broken Arrow, OK, High School for two years before returning to the Sooners' staff as an assistant coach from 1975 through 1979.

O'Dell spent parts of the 1978 campaign working with the outside linebackers at Mississippi State before returning again to Oklahoma as recruiting coordinator. Then in 1979 O'Dell joined the Iowa State University staff and remained there as outside linebacker coach until casting his lot with the Golden Gophers.

Bob Rankin moved onto the University of Minnesota football scene in 1980, began immediately to work with the Golden Gopher tight ends, and looms as the "veteran" of Joe Salem's football assistants.

Rankin is a product of New Hyde Park, NY. The 42-year old has been involved in athletics throughout his life and as a prepster gained All-State honors in both football (as a quarterback) and in baseball (as a pitcher).

Following his graduation from high school, Rankin moved on to Washburn University in Topeka, KS.

After coaching at the high school level in Lakewood, NJ, for three years, Rankin accepted a post as graduate assistant at the University of Illinois in 1968. He spent the 1969 season at William and Mary and the next three years at Rhode Island.

Following stints at Eastern Michigan and Michigan State University, Rankin took over as the head football coach at Heidelberg College in Ohio.

He was on the staff at Toledo University in 1978 and at the University of Tennessee in 1979 before joining Salem at Minnesota.

OUTDOOR STORE

Jim Sherman
Assistant Football
Coach

Roger Thomas
Assistant Football
Coach

Louis West
Assistant Football
Coach

Jim Sherman arrived at the University of Minnesota in 1983 as part of Joe Salem's football coaching staff and took over the assignment of working with the Golden Gophers' defensive line.

The 32-year old Sherman is a 1967 graduate of Phoenix Union High School in Phoenix, AZ. At Phoenix Union, Sherman established himself as both an outstanding athlete and outstanding student and was named his school's "Outstanding Sophomore" and graduated among his school's top 10 percent.

Then Sherman entered the University of Arizona where he gained All-Western Athletic Conference honors as a center and was named his school's Bear Down Award winner, an award given annually to Arizona's Most Inspirational Player.

Sherman's career as a coach includes two years at Amphitheater High School in Arizona, one season as freshman coach at the University of Arizona and seven years at Arizona Western Community College.

In addition to his B.S. degree from Arizona, Sherman also has his M.S. degree from that same institution. He is married and has two children.

Roger Thomas joined the University of Minnesota football coaching staff in 1983 when he was selected by Joe Salem to take over the responsibilities of tutoring the Golden Gophers offensive backfield.

Thomas hails from Skokie, IL, and went on to Augustana College in Rock Island, IL.

After receiving his B.A. degree from Augustana in 1969, Thomas went on to the University of South Dakota and received his M.A. degree from that institution in 1972.

During that latter time span, Thomas functioned as a member of the coaching staff at Augustana Academy in Canton, SD, and as head baseball coach as well as assistant football coach at Augustana College in Sioux Falls, SD.

In 1975 Thomas accepted the post of head football coach at Sioux Falls College, and he held that position through the 1976 campaign when moving to the University of North Dakota as offensive coordinator.

Then in 1980 Thomas took over as offensive coordinator and assistant head coach at California State University in Fullerton. He is 36 years old and married.

Louis West accepted the call from Head Coach Joe Salem in 1983 to join the University of Minnesota football staff as the defensive secondary tutor.

West claims Niles, OH, as his hometown and attended McKinley High School there. He was graduated in 1973 but not before excelling in football, basketball and track.

From McKinley, West went on to the University of Cincinnati and received his B.S. degree in 1977. West also earned his M.S. degree in secondary education from the University of Arizona in 1980.

While an undergraduate at Cincinnati, West played four years of football as a defensive back and earned spots in the North-South Shrine All-Star game and the Blue-Grey Classic in 1976.

In 1978 West held the post of football coach at Casa Grande Union High School in Arizona, and during the 1979 and 1980 campaigns served as an assistant football coach at Arizona Western Junior College.

Then in 1981 West took over as an assistant football coach at Middle Tennessee State University. The 30-year old West and his wife, Gail, have one son.

The University of Minnesota's international reputation for excellence and achievement is the heritage of its alumni. Look to the Metrodome scoreboard during Gopher games for reminders of

alumni achievements and of the Minnesota Alumni Association's important role in maintaining the University's excellence. Call 373-2466 for information about membership and benefits.

Bob Rohde
Strength Coach

Vinny Cerrato
Graduate Assistant

Bob Rohde joined the University of Minnesota athletic staff in 1979 as the Gophers' first strength coach and director of the Gold Country weight training program.

Thirty-five years old and single, Rohde is a product of nearby Wisconsin. He attended Watertown High School there and lettered in football, basketball and track. Rohde gained All-State honors in football and basketball as a prepster, playing halfback on the gridiron and guard on the hardwood.

Following his graduation in 1965, Rohde went on to attend the University of Wisconsin Stevens Point where he was a four-year starter at halfback and earned All-Conference honors.

From Stevens Point, Rohde signed with the Denver Broncos of the National Football League and played one season with the Broncos. It was during his tour of duty in Denver that he became active in weight programs.

Since then, Rohde taught and coached at high schools in Oshkosh and Stevens Point in his native state of Wisconsin. His special area of attention at both sites was on weight training and work with Nautilus equipment.

Chevrolet's M.V.P.

We're proud of our newest Most Valuable Performer—the new Corvette. The sporting analysts of the automotive world, the enthusiast magazines, are pretty impressed with it, too. *Car and Driver* magazine called it, "The most advanced production car on the planet."

That makes us feel pretty good at Chevrolet. Because a lot of deep thinking and hard work went into creating the new Corvette.

The dedication that went into Corvette is the same dedication demonstrated by the athletes of the National Collegiate Athletic Association. And since we know

what hard work is all about, we established the Chevrolet Scholarship Program back in 1971. This awards the Most Valuable Players in NCAA football and basketball games with a donation to their respective school's general scholarship fund.

To date, over 1,800 scholarships, totaling over 1.9 million dollars, have been donated to assist men and women in furthering their educations.

At Chevrolet, we strive for excellence. That's why we support the goals of the NCAA and that's why we offer cars like our Most Valuable Performer—the new Corvette.

Let's get it together... buckle up.
